STRENGTHS

- 🗣️ **Effective Communicator**
Initiates open dialogue in classrooms, aiding students in complex problem-solving discussions.
- 💻 **Innovative Teacher**
Embraces new teaching technologies, blending traditional methods to meet diverse student needs.
- 👥 **Adaptable Leader**
Recognizes shifting student dynamics and reshapes strategies to foster engaging learning experiences.
- 💡 **Collaborative Mentor**
Encourages teamwork among students while giving guidance rooted in solid engineering principles.
- 🔧 **Hands-On Experience**
Widely experienced with equipment like CNC machine and Solidworks to provide real-world education.

SKILLS

Solidworks Matlab
CNC Machining
Manufacturing Processes
Thermodynamics Teaching
Curriculum Development
Robotics Design
Laboratory Instruction
3D Printing Techniques
Project Management
Assessment Strategies
Technical Communication

SUMMARY

Passionate Mechanical Engineering instructor with a master's degree and years of hands-on experience teaching Thermodynamics, Engineering Methods, Robotics, and Manufacturing Processes. Successfully guided students through practical implications of engineering concepts using Solidworks and Matlab. Fostered a collaborative learning environment, encouraging student exploration and innovation within mechanical design disciplines. Known for integrating modern technology into coursework, enhancing learners' engagement and ensuring alignment with industry standards. Demonstrated commitment to continuous improvement and collaboration with peers to develop an enriching curriculum, resulting in improved student outcomes.

EXPERIENCE

Mechanical Engineering Instructor

University Project 📅 August 2025 - Present 📍 Remote

Instructed courses on Thermodynamics, Engineering Methods, and Robotics in a remote capacity, advocating interactive learning methods and using technology-driven approaches to enhance understanding. Effectively prepared engaging instructional materials aligned with course objectives, promoting practical skills while reinforcing strong theoretical foundations. Cultivated a responsive classroom atmosphere, allowing for adaptive teaching based on diverse learner needs and fostering peer collaboration among students.

- Developed comprehensive lessons on Thermodynamics and practical applications using Solidworks software.
- Engaged students with hands-on experiences such as CNC machining and laser cutting projects.
- Collaborated with faculty to refine educational materials ensuring relevance to industry practices and standards.
- Utilized innovative strategies to encourage participation and collaboration among students in technical experiments.
- Provided tailored assessments and constructive feedback to improve students' academic performance and skill sets.
- Created inclusive environments accommodating various learning styles, greatly improving student satisfaction.

Robotics Research Assistant

Academic Research 📅 September 2024 - May 2025 📍 Chicago, IL

Contributed to advanced robotics research focusing on Matlab programming and simulated mechanical design principles. Worked closely with faculty and fellow researchers to investigate advancements within the field of automation, emphasizing collaboration and meaningful contribution to projects. Supported lab management and ensured compliance with safety regulations, providing mentoring support for undergraduate students engaged in research.

- Assisted with design and execution of various robot-related projects, enhancing programming proficiency in Matlab.
- Engaged in team collaborations regarding automation technological advancements, resulting in published findings.
- Maintained laboratory equipment and ensured a safe working space for students participating in experiments.
- Presented project results at university conferences, showcasing team efforts through strong visual and spoken communication.
- Supported training sessions mentoring peers in advanced robotics and research methodologies, enhancing knowledge sharing.
- Contributed effectively to descriptive project documentation, bolstering academic credibility and visibility for joint efforts.

MY CAREER

● Mechanical Engineering Instructor at University Project (10 Months)

● Robotics Research Assistant at Academic Research (8 Months)

● Engineering Methods Lab Assistant at Student Lab (5 Months)

Student Lab 📅 January 2024 - June 2024 📍 Chicago, IL

Facilitated lab instruction focused on Solidworks design and 3D printing technologies, actively assisting students as they developed essential engineering skills. Actively contributed to creating lab manuals and workshop content aimed at enhancing student comprehension of engineering processes while adhering to established safety protocols.

- Conducted teaching labs for Solidworks design-focused student projects, demonstrating practical tools and techniques.
- Oversaw the application of safety and quality measures for all demonstration activities within lab settings.
- Initialized workshops aimed at presenting new technology and techniques related to 3D printing methodology.
- Collaborated closely with faculty members to align lab experiences with standard engineering curricula and enhance quality.
- Provided targeted evaluations and feedback on student projects to facilitate growth against industry benchmarks.
- Strengthened lab organization leading to improved workflow efficiencies and higher student engagement during sessions.

LEADERSHIP & AWARDS

- Dean's List, Illinois Institute of Technology - 2024
- Dean's List, Illinois Institute of Technology - 2025

EDUCATION

Master of Science in Mechanical Engineering

Illinois Institute of Technology 🎓 GPA: 3.9 📅 2026 📍 Chicago, IL

Coursework: Thermodynamics, Solid Modeling, Robotics, CNC Machining

CERTIFICATIONS

- Certified Solidworks Professional (CSWP) 📅 2025
- Engineering Dynamics Certification 📅 2026

TECHNICAL SKILLS

- **Design Software:** Solidworks, AutoCAD, CATIA
- **Simulation Tools:** MATLAB, ANSYS, Simulink
- **Machining Equipment:** CNC Mill, 3D Printers, Laser Cutter
- **Research Methodologies:** Qualitative Analysis, Quantitative, Usability Testing
- **Project Management Tools:** Trello, Asana, Microsoft Project
- **Classroom Technology:** Google Classroom, Zoom, Microsoft Office Suite
- **Web Design Platforms:** Wix, WordPress, Webflow
- **Electrical Systems:** Arduino, Raspberry Pi, PLC Programming
- **Quality Standards:** ISO 9001, Six Sigma, Lean Manufacturing
- **Compliance Regulations:** OSHA Regulations, ASME Standards, Environmental Policy

PROFESSIONAL AFFILIATIONS

- Member, American Society of Mechanical Engineers (ASME) - 2023 – Present
- Volunteer, Engineering Outreach Program - 2023 – Present
