

Liliana Bishop

AI Engineer Consultant

JUNE 19, 2026

Hiring Manager
Innovative Tech Solutions
San Diego, CA

Dear Hiring Manager,

I am excited to express my interest in the AI Engineer Consultant role at Innovative Tech Solutions, where my passion for AI infrastructure intersects harmoniously with your innovative objectives, aligning with my robust background in LLM and GenAI development.

In my current position at Tech Innovations Inc., I have collaborated with diverse teams to implement scalable AI solutions, ensuring that production pipelines operate flawlessly and comply with necessary governance, steadily enhancing operational standards that meet immediate business needs.

Previously, while working at Smart Data Solutions, I devised data retrieval processes using advanced AI models; this enriched various clients, allowing them to harness AI capabilities more efficiently. The challenges faced during this time helped me grow immensely, revealing both my strengths and areas where I hesitated.

My Bachelor's degree in Computer Science from the University of Texas, paired with AWS and Data Science certifications, further solidifies my understanding of the necessary technical frameworks to propel AI applications toward success, fostering a seamless user experience.

With a solid foundation in API development and real-time inference services, I strive to build not just effective, but reliable AI products, ensuring that ethical and governance standards are integrated at every step.

I look forward to the opportunity to discuss how I can contribute to the dynamic team at Innovative Tech Solutions.

Thanks,

Liliana Bishop
