JULY 30, 2026

Hiring Manager
The TechVision Group
Fort Lauderdale, FL

Dear Hiring Manager,

I am thrilled to apply for the AI Engineer Internship at The TechVision Group. This position perfectly matches my educational journey and hands-on experiences. I embrace the challenges of the role and understand its significance in shaping innovative client solutions.

During my time at Florida Atlantic University, I dived into projects that ignited my curiosity. I crafted a low-code automation workflow using n8n, which boosted data efficiency. My efforts in integrating AI into those processes, while ensuring clarity, confirmed my passion for technology.

Additionally, my experience at a hackathon taught me valuable lessons in collaboration. Developing an AI tool that predicted student performance based on past data sharpened my skills immensely. The fast-paced environment stretched my problem-solving abilities.

I have worked diligently on mastering Python and low-code solutions. My experiences have refined my ability to communicate complex ideas simply to diverse audiences. Learning in cohesive team settings has made me adaptable and eager to contribute.

Realizing the importance of contributing to client goals while learning each day drives my motivation. Each project has taught me about teamwork and the significance of clear documentation to improve workflows.

Thank you for considering my application.

Sincerely,

Julian Frazier
