

# Leo Singleton

AI Product Engineer

JUNE 19, 2026

Hiring Manager  
VetsEZ  
Philadelphia, PA

Dear Hiring Manager,

I am excited to apply for the AI Product Engineer role at VetsEZ. This opportunity aligns seamlessly with my skills. Crafting innovative AI solutions drives my passion.

VetsEZ's commitment to enhancing patient care resonates with me. Improving healthcare through technology feels rewarding. I thrive in environments where diversity fuels creativity.

While I faced challenges in previous roles, like aligning AI functionalities with clinical needs, these experiences taught me resilience. For instance, leading a multidisciplinary team at Innovative Tech Solutions, I managed to overcome hurdles and deliver successful AI-driven applications.

At NextGen Health Technologies, the opportunity to develop cloud-native microservices sharpened my skills. Collaborating with engineers and clinicians made our solutions user-centered, beneficial, and highly efficient.

I am eager to harness my proficiency in Python, TypeScript, and cloud-native architectures at VetsEZ. Enhancing patient engagement and operational efficiency is my goal.

Thank you for your consideration.

Sincerely,

*Leo Singleton*
