Dear Hiring Manager,

I am excited to express my interest in the Airport Civil Engineer Intern position at Horizon Infrastructure Solutions, an esteemed company whose commitment to excellent infrastructure projects resonates deeply with my evolving passion for civil engineering and community enhancement.

In numerous collaborative academic projects, I have learned the essence of teamwork, working diligently with diverse groups on airfield-related tasks that shaped my perspective on shared goals and responsibilities, embodying the very values I see reflected within your organization's culture.

During my recent capstone project, I developed an innovative airfield grading plan using AutoCAD, ultimately enhancing runway safety through optimal drainage solutions; receiving constructive feedback not only honed my technical skills but also reinforced my desire to contribute meaningfully to critical engineering undertakings like those at Horizon.

While engaging with peers in a student research assistant role, I participated in studies evaluating environmental impacts, demonstrating a commitment to sustainable practices; each moment presented both challenges and growth, shaping my awareness of the delicate balance between development and ecological preservation.

I acknowledge that embarking on this journey might be daunting, yet I find motivation in tackling new challenges, which only serves to strengthen my resolve to pursue this internship wholeheartedly, keen to apply my knowledge while learning from skilled professionals at Horizon Infrastructure.

I look forward to the possibility of collaborating with your talented team.

Thanks,

*Adrian Beasley*
