STRENGTHS

- 🔍 **Evidence-led investigations**
Correlated authentication, process, DNS, and proxy evidence during recurring investigations, giving responders clearer paths from alert to action.
- 🕒 **Detection improvement**
Tested Regex logic, YARA rules, and SIEM searches against approved events; analysts gained more consistent signals and review habits.
- 🗣️ **Clear incident communication**
Turned technical findings into concise summaries for leaders, infrastructure teams, and application owners when decisions needed context.
- 💻 **Practical automation**
Used Python and PowerShell for evidence collection, IOC lookup, and repeatable analysis; teammates received useful scripts instead of manual steps.
- 👥 **Calm cross-team response**
Worked with infrastructure partners on containment and recovery decisions, keeping investigations moving even when several cases arrived together.

SKILLS

Alert Triage Incident Response

OSI Model Python PowerShell

SUMMARY

Associate cybersecurity engineer with two years supporting **alert triage**, security monitoring, detection engineering, and incident investigations across cloud-connected enterprise environments. Practical work covers SIEM searches, endpoint and network security, DLP, web and email security, Windows and Active Directory, Linux, TCP/IP, CLI analysis, and cloud security concepts. Applies **NIST Incident Response Life Cycle** and **MITRE ATT&CK Framework** to organize evidence, assess risk, and recommend containment or recovery actions. Builds Python and PowerShell utilities, Regex patterns, and YARA rules within Agile and DevOps settings. Clear documentation, careful judgment, and stakeholder communication support effective work across infrastructure, application, and business teams. Ready to help Pioneer Auto Finance strengthen detection quality, **incident response**, and protection for corporate users, assets, and networks.

EXPERIENCE

Cybersecurity Analyst

Northstar Mobility Finance 📅 March 2025 - Present 📍 Irving, TX

Supports enterprise security operations across SIEM, endpoint, email, network, Windows, Active Directory, cloud, and web environments. Owns alert investigations, detection tuning, evidence collection, incident documentation, and cross-functional response decisions while tracking parallel work through Agile queues.

- Triaged **SIEM**, endpoint, email, and network alerts using authentication and DNS evidence.
- Investigated suspicious sign-ins and malware indicators through NIST-aligned incident workflows.
- Built SIEM searches and dashboards for Windows, **Active Directory**, cloud, and **web traffic**.
- Tuned **Regex** detections and validated YARA rules against approved malware test events.
- Used PowerShell, Python, and CLI tools to collect evidence for **containment** decisions.
- Briefed leaders and system administrators on findings, trends, risks, and **recovery** actions.

Cybersecurity Intern

Blue Ridge Security Lab 📅 June 2024 - February 2025 📍 Dallas, TX

Supported supervised security operations across endpoint, network, email, and cloud lab environments. Practiced SIEM analysis, ATT&CK mapping, OSI-based reasoning, scripting, DLP, WAF, CASB, SOAR, and response documentation while presenting evidence to mentors and student teams.

- Analyzed supervised endpoint, network, email, and cloud events in lab environments.
- Built SIEM queries for TCP/IP, **Windows**, **Linux**, authentication, and web logs.
- Mapped observed tactics and techniques to MITRE ATT&CK for analyst review.
- Created Python and **PowerShell** scripts for IOC lookup and evidence collection.
- Practiced **DLP**, WAF, CASB, SOAR, and **web security** workflows in sandbox exercises.
- Presented technical findings and **detection** recommendations to mentors and student teams.

PROJECTS

Cloud Detection Tuning Lab 📅 2025

Improved detection quality by testing SIEM searches, Regex logic, and YARA rules against simulated cloud, endpoint, and web events. Documented evidence, mapped activity to MITRE ATT&CK, and recorded containment recommendations.

Incident Response Evidence Playbook 📅 2024

Built a practical response guide covering alert triage, investigation, containment, eradication, and recovery. Connected NIST lifecycle steps with Windows, Linux, TCP/IP, and command-line evidence collection.

LANGUAGES

MY CAREER

LEADERSHIP & AWARDS

- Dean's List, University of Texas at Dallas, 2023 and 2024
- Cyber Defense Case Competition Finalist, 2024
- Academic Excellence Scholarship, 2022-2024
- Incident Response Workshop Coordinator, Cybersecurity Club, 2023-2024

EDUCATION

Bachelor's Degree in Cybersecurity
University of Texas at Dallas 🎓 GPA: 4.0 📅 2024 📍 Richardson, TX
***Coursework:** Incident Response, Network Security, Cloud Security, Digital Forensics*

CERTIFICATIONS

- CompTIA Security+ 📅 2025
- Microsoft Learn: Security, Compliance, and Identity Fundamentals 📅 2024

TECHNICAL SKILLS

- **Security Operations:** Alert triage, incident response, security monitoring
- **Detection Engineering:** SIEM, Regex, YARA
- **Security Platforms:** DLP, WAF, CASB
- **Response Automation:** SOAR, Python, PowerShell
- **Endpoint Systems:** Windows, Linux, macOS
- **Identity Systems:** Active Directory, authentication, access control
- **Network Security:** TCP/IP, OSI model, DNS
- **Cloud Security:** Cloud computing, cloud security, cloud logging
- **Web and Email Security:** Web traffic, email traffic, proxy analysis
- **Security Frameworks:** NIST Incident Response Life Cycle, MITRE ATT&CK, Agile
- **DevOps and Scripting:** DevOps, command line interface, Python
- **Evidence Analysis:** IOC lookup, process analysis, technical documentation

PROFESSIONAL AFFILIATIONS

- University Cyber Defense Team, Blue Team Member, 2022-2024
- Cybersecurity Club, Incident Response Workshop Coordinator, 2023-2024
- Cybersecurity Fundamentals Study Group, Peer Mentor, 2023-2024
