Hiring Manager  
Parsons Engineering  
Oakland, CA  
94612

Dear Hiring Manager,

I am excited to apply for the Bridge Structural Engineer position at Parsons Engineering, as my skills and passion perfectly align with this unique opportunity in structural design, allowing me to contribute to innovative transportation projects that reshape infrastructure.

My journey began at the University of California, where I earned my BS in Civil Engineering in 2018, later refining my expertise at Skyline Engineering Solutions, where I led vital design tasks for major bridge projects, ensuring each challenge was met with precision and creativity.

In the past five years, I have tackled various complex analyses and developed a knack for spatial reasoning, primarily using STAAD.Pro to deliver expressive designs; however, I sometimes grapple with intricate projects that stretch my capacities.

During my tenure, I have forged strong partnerships with clients, enhancing collaboration and delivering successful results across diverse transportation projects, which I believe mirrors your commitment to quality and innovation.

I am drawn to Parsons Engineering for its reputation as a leader in the field, and I am eager to bring my knowledge of design software, like AutoCAD and Microstation, to contribute positively to your esteemed projects.

Thank you for considering my application.

Sincerely,

*Jett Payne*
