STRENGTHS

- 🔍 **Independent Field Judgment**
Handled varied construction stages with sound judgment. Teams relied on clear findings when site conditions changed.
- 💬 **Code Communication**
Explained code and permit requirements in plain language. Contractors often returned for practical guidance.
- ✅ **Compliance Follow Up**
Tracked correction notices through completion. A careful record made each follow up inspection easier to resolve.
- ♥️ **Plan Review**
Compared drawings with installed work and caught discrepancies early. Design professionals valued focused plan check comments.
- 👥 **Staff Training**
Coached newer inspectors through field techniques and documentation. Shared examples helped build consistent service.

Building inspection Plan check

California codes

Construction plans

Correction notices

Permitting software

Building systems

Code interpretation

SUMMARY

Journey level **building inspector** with five years of field inspection and construction review experience across residential, commercial, and industrial projects. Performs independent inspections at multiple construction stages, reviews drawings and basic calculations, and documents compliance with **approved plans**, specifications, and California requirements. Issues **correction notices** and **notices of violation**, verifies corrective work, maintains accurate inspection records, and supports permit and certificate decisions. Interprets building, residential, plumbing, electrical, mechanical, fire, energy, and green building codes for contractors, developers, architects, engineers, property owners, and public agencies. Holds ICC Residential Building Inspector certification and a valid California Class C driver's license. Ready to contribute sound judgment, clear communication, and consistent public service within a community development environment.

EXPERIENCE

Building Inspector

Bayline Building Safety Services 📅 October 2023 - Present 📍 San Jose, CA

Supports independent field inspections, plan checks, compliance follow up, customer service, and staff training across residential, commercial, and industrial construction.

- Inspected active **construction** stages against approved plans, **specifications**, and California building requirements.
- Reviewed drawings, specifications, and **basic calculations**, then prepared written **plan check** comments.
- Issued correction notices and **notices of violation** for documented construction deficiencies.
- Verified corrective work through follow up inspections and maintained complete compliance records.
- Evaluated structural, plumbing, electrical, mechanical, and HVAC installations for safe workmanship.
- Explained codes, **permits**, and inspection procedures to contractors, designers, owners, and residents.
- Trained newer inspectors on field methods, documentation, service standards, and code consistency.

Journey Level Building Inspector

Peninsula Construction Review 📅 September 2021 - September 2023 📍 Redwood City, CA

Performed field inspection, plan comparison, records management, and technical communication for new construction and remodeling projects throughout varied active sites.

- Inspected new construction and **remodeling** work against **approved plans** and adopted requirements.
- Compared installed work with plan details and identified deviations requiring documented correction.
- Maintained inspection **reports**, permit records, **certificates**, and correspondence in software.
- Explained observed deficiencies and follow up requirements to contractors and design professionals.
- Completed inspections across ladders, trenches, uneven surfaces, and confined construction areas safely.
- Used **Windows**, Excel, Word, and **PowerPoint** for tracking, reports, correspondence, and presentations.
