STRENGTHS

- Executive Advisory**
Executive leaders gained clearer choices after complex transformation priorities became practical governance and investment decisions.
- Process Architecture**
Customer teams found a shared path forward when process architecture connected strategy with usable solution options.
- Regulated Manufacturing**
Years in Biopharma settings built credibility with teams where process discipline and business progress must coexist.
- Consultant Mentoring**
Senior consultants became more consistent after delivery reviews turned difficult engagements into useful coaching moments.
- AI Workflow Judgment**
Emerging AI ideas received grounded review, keeping future opportunities tied to practical business value and governance.

SUMMARY

Business transformation consultant with more than eight years guiding **regulated manufacturing** organizations through enterprise process improvement and operating model change. Builds practical process architectures, **transformation roadmaps**, **governance frameworks**, and value realization models for **Life Sciences Biopharma** environments. Advises executive stakeholders by connecting strategic priorities with scalable process solutions, measurable outcomes, and technology enabled improvements. Leads complex consulting engagements, establishes process standards, evaluates industry and technology trends, and mentors senior consultants through delivery quality reviews. Experience with AI enabled workflows adds a forward looking perspective to structured business environments. Collaborative work with customer leaders and consulting teams turns ambitious transformation goals into clear decisions, usable operating models, and sustained business value.

EXPERIENCE

Principal Business Process Consultant

Harbor Point Consulting

January 2020 - Present

Austin, TX

- Leads regulated manufacturing transformation programs for Life Sciences Biopharma customers, shaping **process architecture**, **operating model evolution**, governance, roadmaps, and value realization. Advises executive stakeholders, sets process standards, assesses technology trends, and mentors consultants across complex engagements.
- Directed Biopharma process transformation programs, clarifying operating priorities for regulated manufacturing leaders
 - Mapped enterprise processes to solution options, turning strategy into practical implementation roadmaps
 - Advised **executive stakeholders** on governance models, value drivers, and transformation investment priorities
 - Established **process standards** and **reference models**, giving customer teams a shared delivery language
 - Mentored senior consultants through quality reviews, improving consistency across complex transformation engagements
 - Evaluated **AI enabled workflows**, identifying practical uses for future operating model improvements

PROJECTS

Biopharma Operating Model Roadmap 2023

Connected regulated manufacturing processes with future operating model decisions, governance needs, implementation sequencing, and measurable value outcomes for executive review.

AI Workflow Assessment 2024

Evaluated emerging AI workflow applications within structured business environments, balancing process value, governance expectations, and practical adoption considerations.

LEADERSHIP & AWARDS

- Recognized by consulting leadership for guiding regulated manufacturing transformation programs with clear executive communication.
- Selected to mentor senior consultants through delivery reviews, process standards work, and continuous improvement efforts.
