SUMMARY

Business systems support specialist with four years of enterprise application experience through September 2026, supporting public service, finance, purchasing, and administrative operations. Translates operational needs into technical requirements, system configuration, **data conversion** plans, interface needs, **security** controls, reports, and test scenarios. Coordinates user acceptance testing for upgrades and controlled **software changes**, then confirms defects, approvals, and release readiness. Investigates access, workflow, efficiency, and data extraction concerns through system records, relational database concepts, and user interviews. Creates clear documentation, delivers **user training**, and explains data interpretations for business managers and technical teams. Experience with purchasing, budgeting, reporting, customer service, and multi priority work supports dependable enterprise operations. Ready to help CivicBridge Operations improve system use, service quality, and practical decision making.

EXPERIENCE

Business Systems Support Specialist

August 2024 - Present

MetroCore Public Services

Royal Oak, MI

Supports integrated administrative applications for finance, purchasing, and service teams. Leads requirements work, testing, reporting, security support, training, and controlled application improvements that strengthen daily operations.

- Translated finance and **purchasing** issues into configuration actions, access fixes, reports, and enhancement requests.
- Documented technical requirements, data needs, acceptance criteria, security considerations, and dependencies for system changes.
- Coordinated user acceptance testing, defect retests, approvals, and release readiness for application upgrades.
- Investigated access and data extraction issues through system records, relational concepts, and user interviews.
- Created user guides and delivered training on workflows, **reporting**, **security** expectations, and revised procedures.
- Produced validated management reports and data summaries, explaining operational implications for business managers.

Business Applications Analyst

September 2022 - July 2024

Great Lakes Administrative Network

Lansing, MI

Provided functional support for enterprise applications serving administrative and public facing operations. Maintained processing standards, documented workflow needs, supported testing and access controls, and prepared reporting and training materials.

- Supported **enterprise applications** for administrative operations while maintaining established processing and user access standards.
- Documented requirements and current procedures for purchasing approvals, budget tracking, and internal service workflows.
- Executed structured test scripts for software updates, recorded defects, and verified fixes before release.
- Processed user access and role changes through approved authorization practices, escalating security exceptions for review.
- Built recurring reports and spreadsheet analyses that reconciled application data with department reporting needs.
- Prepared training materials and led small group sessions on data entry, reporting, and revised procedures.

PROJECTS

Administrative Reporting Improvement 📅 2024

Reliable information helps public service teams make fair, timely decisions. Built a reporting improvement effort that clarified source data, reconciled department needs, and gave managers more useful operational summaries.

Enterprise Access Review 📅 2023

Good service begins with dependable access. Supported a structured review of user roles, authorization practices, and security exceptions, helping application users reach needed functions through consistent controls.

LEADERSHIP & AWARDS

- ITIL 4 Foundation achievement recognized in 2025 for service management knowledge.
- Selected to coordinate user acceptance testing and release readiness for enterprise application changes.
- Trusted by application users for clear training, reporting guidance, and practical issue resolution.
