STRENGTHS

- ♥ **Requirements translation**
Turned stakeholder conversations into clear requirements, procedures, tests, and controls. Users gained a practical path forward.
- 🔍 **Exception investigation**
Traced difficult issues through system and field evidence. A direct conversation with users often revealed the missing context.
- 👥 **User enablement**
Created guidance and training that helped managers and users work with confidence. Questions became shared learning moments.
- 🛠️ **Cross functional trust**
Built useful connections across technical and business teams. Colleagues returned for calm advice on difficult application problems.
- 📊 **Data stewardship**
Protected data integrity through validation, quality checks, and careful follow through. Reliable information supported better decisions.

SUMMARY

Business systems support professional with four years of progressive experience supporting **enterprise applications**, operational stakeholders, and business functions. Translates stakeholder needs into **technical requirements**, procedures, tests, controls, and practical improvements. Applies implementation, testing, security, **data integrity**, relational database knowledge, reporting, data extraction, and Microsoft Office skills to resolve issues and protect reliable operations. Experience includes purchasing, **human resources**, budgeting, project coordination, user training, documentation, and cross functional knowledge sharing. Work has grown from business applications analysis into broader ownership, independent decisions, exception investigation, quality checks, and stakeholder consultation. Clear reports and useful guidance help managers act with confidence. Eager to support CivicBridge Operations Group with dependable systems, careful follow through, and service that makes daily work easier for users and business leaders.

EXPERIENCE

Business Systems Support Specialist

Northstar Municipal Solutions 📅 September 2024 - Present 📍 Lansing, MI

Owns broad enterprise systems support for operational and business stakeholders, coordinating requirements, controlled changes, testing, reporting, training, data quality, security, and documentation. Partners across functions to prioritize work, investigate exceptions, guide users, and share practical knowledge that protects service reliability and business continuity.

- Translated **stakeholder needs** into tested requirements, procedures, and controls for enterprise workflows.
- Investigated system exceptions with **field data**, documented causes, and coordinated corrective follow through.
- Coordinated controlled access changes supporting **security**, data integrity, and reliable operational use.
- Built enterprise reports and data extracts that gave managers clearer information for decisions.
- Prepared user **guidance** and training materials that improved adoption across business functions.
- Reviewed implementation results with technical partners and business users before operational release.
- Shared troubleshooting knowledge with peers, strengthening collaboration across support networks.
- Balanced **purchasing**, HR, and budgeting priorities through structured project coordination and **quality checks**

Business Applications Analyst

Harborline Public Services 📅 September 2022 - August 2024 📍 Kalamazoo, MI

Supported business applications serving public service operations, with growing responsibility for requirements, implementation support, testing, reporting, user **consultation**, documentation, and issue resolution. Connected technical teams with business users, maintained evidence based follow through, and built trusted working relationships across functions.

- Documented **technical requirements** from stakeholder meetings and prepared **procedures** for business review.
- Tested application changes against user scenarios before release, reducing avoidable operational disruption.
- Used **relational database** information to trace data discrepancies and support accurate corrections.
- Created reports and extracts in **Microsoft Office** for purchasing, HR, and **budgeting** discussions.
- Guided users through application workflows, answering questions with clear, practical training.
- Recorded decisions, test results, and issue history for consistent support and audit readiness.
