

Nevaeh Gross

Civil Engineering Internship

JULY 04, 2026

Mason Engineering Solutions
Hiring Manager
Gillette, WY

Dear Hiring Manager,

I am eager to express my enthusiasm for the Civil Engineering Internship at Mason Engineering Solutions, where innovative challenges meet practical solutions, a perfect blend perfectly suited to my unfolding passion and educational journey.

In this role, one is not merely a participant but a catalyst for change, infusing academic rigor into projects that resonate with community needs while simultaneously gaining invaluable experience under the guidance of seasoned experts, poised to turn theory into actionable insight.

I often reflect on a recent university project, where my team and I worked collaboratively to design a sustainable drainage system for our local community, an initiative that demanded both creativity and adherence to strict safety protocols, pushing me to learn swiftly while savoring each small victory along the way.

With my background in civil engineering supported by my recent internship experiences, I embrace collaboration and seek to absorb as much knowledge as possible from industry veterans, gravitating toward every opportunity for dialogue and shared growth.

The sense of fulfillment that derives from shaping infrastructure aligned with community needs is significantly rewarding, motivating me to pursue this internship, fostering a deeper understanding of civil engineering within real-world frameworks, while recognizing how transformative proper design can be.

Thank you,

Sincerely,

Nevaeh Gross
