Hiring Manager  
Morrison Engineering Group  
Baltimore, MD

Dear Hiring Manager,

I am excited to present my application for the Civil Project Engineer position at Morrison Engineering Group. This opportunity resonates deeply with my solid eight-year background in land development and project management, precisely aligning with the requirements outlined in your job posting.

Through my tenure at Greenfield Engineering Solutions, I cultivated a knack for orchestrating multiple projects with a keen eye for detail. This includes leading a team of engineers on key tasks, coordinating with clients, and ensuring compliance with regulations. My proactive approach to communication helped eliminate unnecessary delays.

Despite challenges, such as tight deadlines and varied stakeholder needs, I thrived by keeping our goals in focus. For example, steering a recent major project through multiple approvals was no cakewalk. Yet, persistence and real-time communication kept all parties engaged and satisfied.

My background in AutoCAD and Civil 3D further enhances my capability to handle technical tasks efficiently. I have regularly performed hydraulic modeling and site layout design. This clarity in planning ensured that projects stayed within their projected costs.

I understand the Maryland market, especially the intricate regulations that affect project management in Baltimore County. My relationships built over years have paved pathways for smoother collaborations with local contractors and agencies.

I look forward to the possibility of contributing to your team.

Thanks,

*Prince Walter*
