STRENGTHS

- 

Analytical Expertise

Utilized advanced analytical techniques in oncology studies, enhancing insight generation and understanding of disease pathways.
- 

Collaboration Skills

Regularly partnered with cross-functional teams, leading to improved integration of data analysis in broader research initiatives.
- 

Process Improvement

Streamlined documentation processes which increased overall data handling efficacy across projects, facilitating smoother operations.
- 

Technical Communication

Crafted clear presentations for scientific findings, ensuring intricate results were accessible to varied audiences.
- 

Mentorship

Guided junior researchers in data analysis best practices, building a supportive team environment focused on growth.

SKILLS

<u>R</u>	<u>Python</u>	<u>Shell Scripting</u>
<u>Multivariate Statistical Analysis</u>		
<u>Predictive Modeling</u>		
<u>Bioinformatics Pipelines</u>	<u>Git</u>	
<u>High-Performance Computing</u>		
<u>Data Visualization</u>	<u>Cancer Biology</u>	

LANGUAGES

English	Native
Spanish	Intermediate

SUMMARY

Dedicated Computational Biologist with over 6 years of experience specializing in large-scale data analysis and multi-omics datasets. Proven expertise in statistical modeling, machine learning, and bioinformatics tailored to cancer biology, particularly breast cancer. Holds a PhD in Computational Biology and is proficient in R, Python, and shell scripting, with a strong commitment to delivering high-quality results and insights. Excellent communicator and collaborator with a passion for advancing cancer research through innovative analytical approaches. Eager to contribute to cutting-edge research at HealthTech Innovations and propel its clinical objectives.

EXPERIENCE

Computational Biologist

Data Analysis Solutions March 2020 - Present Los Angeles, CA

- Lead team efforts in analyzing large-scale RNA and WES datasets, enabling breakthroughs in cancer research. This role emphasizes collaboration across scientific disciplines and standardization of workflows to ensure efficiency and accuracy.
- Led the analysis of large-scale RNA and WES datasets to provide actionable insights for ongoing cancer research projects.
 - Developed and implemented advanced multivariate statistical models to enhance understanding of disease mechanisms.
 - Collaborated with cross-functional teams to interpret complex data and present findings in a clear, concise manner.
 - Standardized analytical workflows, improving efficiency in data processing and documentation practices.
 - Conducted training sessions for junior team members on best practices in computational biology and data analysis.
 - Authored several research papers based on findings that contributed to advancements in clinical oncology.

Research Scientist

Bioinformatics Corp June 2017 - February 2020 San Francisco, CA

- Played a pivotal role in harnessing clinical omics data through predictive analyses, collaborating closely with clinical teams to fulfill research goals. Presented findings nationally, fostering organization visibility.
- Analyzed clinical omics data utilizing predictive and prognostic methodologies to support hypothesis-driven research.
 - Collaborated with oncology teams to interpret results and deliver insights that aligned with clinical objectives.
 - Automated data processing pipelines using R and Python, significantly reducing analysis time.
 - Maintained version control and documentation of all coding and analytical processes using Git.
 - Engaged in continuous learning and development to stay updated on advancements in computational biology.
 - Presented findings at national conferences, enhancing the visibility of the organization's research initiatives.

Data Scientist

Innovative BioSolutions January 2016 - May 2017 San Jose, CA

- Supported complex data analyses with an emphasis on novel methods and software, contributing significantly in high-performance computing environments focused on cancer research.
- Supported large-scale data analysis projects with a focus on cancer research, utilizing high-performance computing environments.
 - Developed scripts for data cleaning and preprocessing, ensuring data integrity and quality for subsequent analyses.
 - Participated in team meetings to discuss project objectives, outcomes, and next steps,

MY CAREER

- Computational Biologist at Data Analysis Solutions (6.4 Years)
- Research Scientist at Bioinformatics Corp (2.7 Years)
- Data Scientist at Innovative BioSolutions (1.3 Years)

- contributing to collaborative decision-making.
- Investigated novel analytical techniques to enhance data interpretation and visualization capabilities.
- Documented all analytical processes for compliance and reproducibility in research studies.
- Fostered a collaborative environment by mentoring interns and new hires in data analysis techniques.

LEADERSHIP & AWARDS

- Certified Bioinformatics Analyst, 2025
- R Programming for Data Science Certification, 2025

EDUCATION

PhD in Computational Biology
University of California, San Diego 🎓 GPA: 3.9 📅 2016 📍 San Diego, CA
***Coursework:** Computational Genomics, Machine Learning, Statistical Analysis, Data Visualization*

CERTIFICATIONS

- Certified Bioinformatics Analyst 📅 2025
- R Programming for Data Science Certification 📅 2025

TECHNICAL SKILLS

- **Statistical Analysis Tools:** R, Python
- **Scripting Languages:** Shell Scripting
- **Workflow Management:** Git
- **Data Processing Techniques:** Pipelines, Automation Tools, High-Performance Computing
- **Analysis Methodologies:** Multivariate Statistics, Predictive Modeling
- **Biological Databases:** Omics Data Repositories, Clinical Records
- **Visualization Frameworks:** ggplot2, matplotlib, Seaborn
- **Project Coordination Tools:** Trello, Asana, JIRA
- **Machine Learning Platforms:** scikit-learn, TensorFlow, Keras
- **Documentation Standards:** Markdown, LaTeX

PROFESSIONAL AFFILIATIONS

- Member of the American Society for Biochemistry and Molecular Biology
- Contributor to local educational outreach programs related to science and technology
