STRENGTHS

- ♥️ **Critical Care Judgment**
During high acuity assignments, linked changing bedside findings with safe priorities and timely escalation.
- 👥 **Interdisciplinary Coordination**
Physicians and support disciplines received clear updates, keeping treatment priorities aligned during busy shifts.
- ♥️ **Accurate Documentation**
Care records captured assessments, interventions, and responses clearly, supporting smoother handoffs and continuity.
- 🗣️ **Patient Communication**
Patients and families received calm explanations during urgent changes, making next steps easier to follow.
- 🚦 **Safety Focus**
Organized supplies and applied evidence based practices, helping bedside teams respond with steady preparation.

SUMMARY

Critical Care Registered Nurse with three years of **acute care experience** caring for high acuity patients through continuous assessment, close **vital sign monitoring**, complex interventions, and timely escalation. Illinois licensed RN with current Basic Life Support and **Advanced Cardiovascular Life Support** credentials, supported by a Bachelor of Science in Nursing from Bradley University. Provides **individualized care plans**, accurate clinical documentation, patient safety practices, and coordinated treatment with physicians, specialists, pharmacy, respiratory therapy, nursing colleagues, and support staff. Communicates clearly with patients and families during urgent changes, treatment updates, transitions of care, and discharge planning. Maintains calm focus during demanding situations and connects bedside findings with safe clinical priorities. Prepared to bring dependable critical care judgment and compassionate bedside service to a patient centered nursing team.

EXPERIENCE

Critical Care Registered Nurse

Midstate University Hospital 📅 August 2024 to Present 📍 Peoria, IL

Supports high acuity critical care operations through bedside assessment, continuous surveillance, **complex interventions**, accurate documentation, and coordinated treatment planning. Works with physicians, specialists, nursing colleagues, pharmacy, respiratory therapy, patients, and families while supporting safe escalation, continuity of care, and discharge readiness.

- Assessed high acuity patients and prioritized safe nursing actions within individualized clinical plans.
- Monitored vital signs closely and recognized condition changes requiring structured escalation and timely intervention.
- Documented assessments, interventions, responses, and significant changes for **continuity of treatment**.
- Coordinated physicians, specialists, pharmacy, **respiratory therapy**, and support staff around **patient safety**.
- Communicated care updates with patients and families during urgent clinical changes and next steps.
- Applied evidence based safety practices while organizing equipment and supplies for critical interventions.

Registered Nurse, Acute Care

Heartland General Hospital 📅 September 2023 to July 2024 📍 Bloomington, IL

Delivered **acute care** nursing across patient assessments, individualized **care planning**, treatment coordination, clinical documentation, and discharge preparation. Partnered with physicians, nursing colleagues, and support disciplines to maintain safe handoffs, respond to changing conditions, and support clear communication with patients and families.

- Completed acute care assessments and translated findings into prioritized nursing actions.
- Monitored patient status and escalated meaningful changes through structured clinical communication.
- Recorded interventions, responses, and status changes accurately within patient care documentation.
- Coordinated **physicians**, nurses, and support disciplines during treatment and transition planning.
- Explained care activities, immediate concerns, and next steps using patient centered communication.
- Applied evidence based safety practices and maintained organized supplies for reliable bedside care.
