Hiring Manager
Equinix
San Jose, CA
CA, 95131

Dear Hiring Manager,

I am excited to express my interest in the Data Center Development Internship at Equinix, a position that fits seamlessly with my academic focus and practical experiences, where I can immerse myself in electrical engineering and dive into hands-on tasks that truly define this fascinating field.

At my university, I recently spearheaded a project that revolved around developing an automated HVAC control system, which smartly improved energy efficiency by 15%, proving that even small adjustments can lead to substantial results.

Yes, I faced various hurdles while collaborating with peers, but together we crafted precise electrical schematics, designed around strict safety regulations, to ensure our project met high standards from start to finish, demonstrating the importance of teamwork.

While working as a Facilities Maintenance Intern, my commitment shone through, as I diligently recorded maintenance activities, developed efficient workflows, and engaged in customer interactions, all of which cultivated a strong sense of initiative and capability that I carry with me.

Adaptability has always been paramount for me; during the recent hackathon, our diverse team prospered as we developed a data center simulation tool, which earned us the 'Best Technical Solution' award, showing that cooperation unlocks innovative pathways even under pressure.

This opportunity at Equinix stands as a remarkable chance to further refine my skills, contribute to impactful solutions, and immerse myself within an organization that echoes my own aspirations for a career rich in both challenges and rewards.

I appreciate your consideration for this role.

Sincerely,

Jasper Woods
