## Data Center Hardware Technician

AUGUST 11, 2026

Hiring Manager  
Tech Solutions Inc.  
Lockport, NY

Dear Hiring Manager,

I am thrilled to apply for the Data Center Hardware Technician position at Tech Solutions Inc., which perfectly aligns with my skills and enthusiasm for technology while allowing me to contribute to your dynamic team through my hands-on experience and deep knowledge base, especially in the UNIX and TCP/IP networks.

At Tech Innovations LLC in Buffalo, where I work currently, I maintain and repair servers. This opportunity has taught me how to prioritize urgent requests effectively while collaborating seamlessly with engineering teams, as I leverage AI tools to diagnose issues and reduce repair times significantly.

Prior to this, as a Junior Data Technician at Data Solutions Group, I undertook various responsibilities, including using scripting languages to automate tasks and improve workflow efficiency, solidifying my skills in data center operations.

Technically skilled yet genuinely committed to contributing to team dynamics, I understand the challenge of performing under pressure, especially in the fast-paced environment of a 24/7 data center, and I continually seek ways to enhance my collaborative abilities while remaining flexible in my approach.

I foresee my journey at Tech Solutions as not just a stepping stone but rather a place where my background and skills will flourish further, allowing me to align with your mission of providing uninterrupted service.

Thank you for your consideration.

Sincerely,

*Karter Barnes*
