

Timothy York

Data Scientist, Mid Level

☎ (703) 555-0184 ✉ timothy.york@outlook.com

🌐 linkedin.com/example/timothyork 📍 Alexandria, VA 22314

SUMMARY

Mid-level **Data Scientist** with more than five years delivering analytics, **predictive risk models**, dashboards, automations, and decision support for federal program operations. Converts inconsistent source data, API feeds, SharePoint records, and unstructured documentation into normalized datasets, statistical models, management visualizations, and documented BI products. Brings hands-on skill with Python, SQL, R, NumPy, MATLAB, Weka, SPSS, Anaconda, Power BI, Power Platform, SharePoint, InfoPath, Power Automate, ETL, and federal systems integration. Active **Top-Secret clearance** and **U.S. citizenship** support secure on-site collaboration in Arlington. Ready to contribute practical insight, thoughtful partnership, and dependable delivery to Civic Vector Solutions' public-sector mission.

EXPERIENCE

Data Scientist

Northbridge Federal Analytics 📅 January 2024 - Present 📍 Arlington, VA

Owns end-to-end analytics delivery for a federal oversight portfolio, guiding data calls, predictive modeling, BI products, Power Platform applications, and secure integration decisions for program managers.

- Governed API feeds, **SharePoint** records, and manual transfers through SQL and Python data products.
- Built logistic regression models for case prioritization across federal operating units and review teams.
- Classified 18,000 pages with Python NLP workflows, surfacing control themes for analyst review.
- Rebuilt **Power BI dashboards** with dimensional models, drill-through views, and documented refresh logic.
- Connected **Power Platform** applications with SharePoint and **InfoPath** submissions, improving intake traceability.
- Documented storage options, validation rules, **data calls**, and operating procedures for security stakeholders.

Data Analyst

Blue Mesa Public Sector Consulting 📅 January 2022 - December 2023 📍 Washington, DC

Delivered recurring federal analytics services across data integration, **statistical analysis**, **risk assessment**, BI reporting, workflow automation, and user documentation for four program offices.

- Joined SQL extracts, REST API responses, and spreadsheets into auditable federal analytical datasets.
- Used R, Python, **NumPy**, and SPSS for statistical summaries supporting quarterly risk reviews.
- Created Power BI visualizations for workload, exceptions, and compliance trends used by managers.
- Maintained SharePoint lists, InfoPath forms, and Power Platform **automations** across four program offices.
- Prototyped **Weka** document classification in **Anaconda**, documenting precision checks for analyst workflows.
- Established data-quality checks for identifiers, duplicates, and dates, strengthening management report confidence.

Business Intelligence Analyst

Harbor Point Research Group 📅 May 2021 - December 2021 📍 Bethesda, MD

Supported a supervised federal analytics engagement through SQL staging, exploratory reporting, dashboard delivery, intake testing, model comparison, and user guidance for senior analysts.

- Consolidated program files and system extracts into **SQL** staging tables for exploratory reporting.
- Produced **Power BI** dashboards covering case volume, aging, and risk indicators for reviewers.

STRENGTHS

Risk Modeling

Built logistic regression and decision-tree models for federal case prioritization; reviewers gained a clearer basis for action.

Data Translation

Turned fragmented records and policy documents into usable datasets and visuals; program managers gained confidence in findings.

Workflow Partnership

Worked closely with security, infrastructure, and program teams; shared decisions moved forward with fewer surprises.

BI Storytelling

Paired Power BI metrics with source definitions and guidance; nontechnical managers became more comfortable using reports.

Practical Automation

Connected Power Platform, SharePoint, and InfoPath workflows; intake became easier to trace and less dependent on rekeying.

SKILLS

Python SQL R Power BI

Machine Learning

Predictive Modeling

Statistical Analysis

Data Visualization ETL

Data Normalization

Natural Language Processing

Federal Systems Integration

Technical Documentation

API Integration

LANGUAGES

MY CAREER

- Data Scientist at Northbridge Federal Analytics (2.7 Years)
- Data Analyst at Blue Mesa Public Sector Consulting (1.9 Years)
- Business Intelligence Analyst at Harbor Point Research Group (7 Months)

- Created **Python** and **R** scripts for normalization, validation, and repeatable weekly refresh preparation.
- Tested **SharePoint** and InfoPath intake configurations with representative records and logged defects.
- Compared Weka and **MATLAB** approaches on labeled data, documenting assumptions and evaluation results.
- Authored a user guide covering dashboard navigation, lineage, refresh timing, and risk interpretation.

PROJECTS

Federal Risk Insight Hub 📅 2025
Created a secure prototype combining Python feature engineering, SQL data normalization, Power BI visuals, and predictive risk scoring for program review teams.

Document Intelligence Pilot 📅 2023
Built a Weka and Anaconda classification pilot for unstructured federal documents, with validation notes, analyst review queues, and practical escalation guidance.

LEADERSHIP & AWARDS

- Received a 2025 Federal Analytics Delivery Award for dependable risk reporting and stakeholder partnership.
- Earned a 2024 Client Impact Recognition for improving Power BI reporting and intake traceability.
- Led peer knowledge sessions on data quality, model review, and clear documentation for analysts.

EDUCATION

Master of Science in Data Science
George Mason University 🎓 GPA: 4.0 📅 2020 📍 Fairfax, VA
Coursework: Machine Learning, Statistical Modeling, Data Visualization, Database Systems

Bachelor of Science in Statistics
Towson University 🎓 GPA: 3.8 📅 2018 📍 Towson, MD
Coursework: Probability, Regression Analysis, Statistical Computing, Experimental Design

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate 📅 2023
- Microsoft Certified: Power Platform Functional Consultant Associate 📅 2024
- Active Top-Secret Clearance 📅 2024

TECHNICAL SKILLS

- **Programming Languages:** Python, R, SQL
- **Data Science Libraries:** NumPy, pandas, SciPy
- **Machine Learning:** Logistic Regression, Decision Trees, Classification
- **BI Platforms:** Power BI, SPSS, MATLAB
- **Microsoft Platforms:** Power Platform, SharePoint, InfoPath
- **Workflow Automation:** Power Automate, Power Apps, SharePoint Lists
- **Data Integration:** REST APIs, ETL, System-to-System Connections
- **Data Engineering:** SQL Server, Data Normalization, Data Validation
- **Text Analytics:** Natural Language Processing, Weka, Anaconda
- **Federal Analytics:** Federal Systems, Risk Assessment, Data Calls
- **Documentation:** User Guides, Data Lineage, Operating Procedures

PROFESSIONAL AFFILIATIONS

- Member, Institute for Operations Research and the Management Sciences, supporting applied analytics practice.

- Member, Data Management Association, exchanging methods for governance, integration, and trusted reporting.
