Department Chair, Biomedical Engineering
Innovative Engineering Solutions
Ann Arbor, MI
Full-time

Dear Hiring Committee,

I am thrilled to apply for the Department Chair position within Biomedical Engineering at Innovative Engineering Solutions, a remarkable opportunity that resonates profoundly with my aspirations and experiences, as I possess a robust synthesis of leadership, teaching, and research prowess, cultivated over more than a decade in academia, where I have woven together innovative practices with diligent mentoring.

Leading a progressive department requires visionary insight, and I bring a wealth of student engagement strategies and collaborative frameworks that will foster cross-disciplinary partnerships, which I believe are vital in confronting today's healthcare challenges, especially those intersecting AI and biomedical research, where I've successfully steered initiatives and secured substantial funding through creative grant applications.

While navigating my journey, doubt has occasionally lurked; however, through perseverance, I transformed those challenges into resilient strategies that not only enriched my career but bolstered my team's collaborative spirit, exemplified through my recent success in introducing advanced curricula that prioritize both innovation and inclusion.

Through my previous roles, I designed new biomedical courses that engaged students dynamically, resulting in heightened participation and interest, while simultaneously fostering a culture of academic excellence, thus paving pathways for future leaders in our field who are eager to thrive.

Together, we can elevate the department's mission, strengthening its position as a frontrunner within the biomedical engineering community, relating to the broader goals of our institution, thereby ensuring our shared commitment to propel our mission forward.

I look forward to discussing my candidacy in more detail.

Thanks,

Piotr Rice
