DevOps Software Cloud Engineering Intern

JULY 07, 2026

TechWave Solutions  
Hiring Manager  
Chicago, IL

Dear Hiring Manager,

I am thrilled to submit my application for the DevOps Software Cloud Engineering Intern position at TechWave Solutions. This opportunity excites me, as it aligns with my passion for developing software and enhancing cloud automation capabilities.

At University, I collaborated with a team to design a CI/CD pipeline that improved the deployment speed by an astonishing thirty percent. Engaging in such projects has fortified my ability to work collaboratively while contributing towards innovative solutions that enhance productivity.

As I participated in a hackathon focused on building a responsive application, I implemented automated tests that significantly improved reliability. My coding experiences in Python and shell scripting allow me to adapt quickly to new challenges.

I often find myself challenged by complex coding tasks, yet I embrace these obstacles as opportunities for learning. Seeking feedback from peers has enhanced my growth journey, demonstrating my commitment to personal development.

Contributing to observability dashboards at my University project fueled my interest in making code pipelines more efficient and transparent. I aim to blend my skills and experiences to provide meaningful contributions at TechWave Solutions and foster innovative solutions.

Thank you for considering my application.

Sincerely,

*Juan Colon*
