SUMMARY

Motivated DevOps / SRE Engineer with over three years of hands-on experience in enhancing cloud infrastructure. Skillful in developing and leading CI/CD pipelines, primarily utilizing GitHub Actions for rapid software deployment. Well-versed in AWS management and Terraform implementation to ensure efficient infrastructure as code practices. Experienced with containerization technologies like Docker and Kubernetes, ensuring system reliability and scalability. Committed to upholding security standards through comprehensive DevSecOps practices across the development lifecycle. Eager to contribute to improving operational efficiency while facilitating seamless purchasing experiences for customers.

EXPERIENCE

DevOps Engineer June 2024 - Present
Cloud Innovations LLC *Dallas, TX*

Oversaw operations as a DevOps Engineer at Cloud Innovations, focusing on designing an efficient CI/CD pipeline and managing extensive cloud infrastructure solutions to meet organizational needs. Earned recognition for optimizing workflows, enhancing system security, and delivering strong performance outcomes.

- Spearheaded design and implementation of CI/CD pipelines utilizing GitHub Actions, resulting in a substantial reduction in deployment time.
- Developed and managed cloud infrastructure on AWS, applying Terraform effectively for modern infrastructure as code practices.
- Coordinated with cross-functional teams to troubleshoot complex issues across the stack, enhancing overall service reliability.
- Implemented monitoring solutions using Datadog, significantly improving incident response times without sacrificing quality.
- Enforced stringent security best practices across DNS, IAM, and firewall configurations to ensure compliance with PCI-DSS standards.
- Led legacy applications transition to containerized environments with Docker and Kubernetes, ensuring enhanced scalability.

SRE Engineer January 2023 - May 2024
Tech Systems Group *Houston, TX*

Functioned as an SRE Engineer, responsible for maintaining and scaling infrastructure operations on AWS. Engaged actively in security practices and built custom tools aimed at streamlining processes.

- Managed infrastructure operations on AWS, optimizing performance and reducing costs through strategic resource allocation.
- Collaborated on security initiatives by effectively embedding DevSecOps practices throughout the software development lifecycle.
- Developed automation tooling that improved operational processes, enhancing team productivity and resource management.
- Participated thoroughly in compliance audits, coordinating efforts with stakeholders to maintain high regulatory standards.
- Contributed scripts in Python aimed at automating repetitive tasks, thus minimizing manual errors.
- Enhanced observability by integrating advanced logging systems for proactive management and troubleshooting.

Junior DevOps Engineer July 2021 - December 2022
Innovatech Solutions *San Antonio, TX*

Embarked on a foundational role as a Junior DevOps Engineer, gaining invaluable experience in CI/CD pipelines and cloud infrastructure management.

- Assisted in maintaining and optimizing CI/CD pipelines using Jenkins and GitHub Actions, which improved release cycle efficiencies.
- Gained practical experience managing containerized applications with Docker, supporting a shift towards microservices architecture.
- Helped deploy applications on AWS, acquiring essential skills in cloud infrastructure management best practices.
- Participated in developing automated testing frameworks that ensured software delivery met quality standards.
- Worked alongside development teams to address and resolve application performance challenges effectively.
- Documented procedures and produced training materials for new employees, fostering a collaborative onboarding process.

LEADERSHIP & AWARDS

- Outstanding Contribution Award for achieving a significant drop in application downtime through innovative monitoring solutions.
- Team Excellence Award for collaboration and delivery on a critical project that enhanced cybersecurity measures.

EDUCATION

Bachelor's Degree in Computer Science 2025
University of Texas at Austin GPA: 3.5 *Austin, TX*

Coursework: Data Structures, Operating Systems, Cloud Computing, Software Engineering

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate 📅 2026
- Terraform Associate Certification 📅 2026

TECHNICAL SKILLS

- **Infrastructure Automation Tools:** Terraform, Ansible, CloudFormation
- **Cloud Platforms:** Amazon Web Services, Google Cloud Platform, Azure
- **Container Orchestration:** Docker, Kubernetes, OpenShift
- **CI/CD Tools:** GitHub Actions, Jenkins, Travis CI
- **Monitoring Tools:** Datadog, New Relic, Prometheus
- **Scripting Languages:** Python, Go, Bash
- **Version Control Systems:** Git, SVN, Mercurial
- **Security Standards:** PCI-DSS, ISO 27001, OWASP
- **Programming Frameworks:** Flask, Spring, Express.js
- **Configuration Management:** Chef, Puppet, SaltStack

SKILLS

- GitHub Actions
- AWS
- Terraform
- Docker
- Kubernetes
- Datadog
- Python
- Go
- DevSecOps
- PCI-DSS Compliance
- Cloud Infrastructure Management
- Monitoring Solutions
- Continuous Integration
- Incident Response
- Automation Tools

PROFESSIONAL AFFILIATIONS

- Active member of the DevOps Community of Practice, sharing insights and learning from peers regularly.
- Volunteer at local tech events focused on introducing underrepresented groups to technology careers.

LANGUAGES

- English (Native)
- Spanish (Proficient)
