

NASIM CHRISTENSEN

DEVOPS & TOOLS ENGINEER

(206) 555-1234 nasim.christensen@example.com

linkedin.com/in/nasimchristensen 1234 Maple St, Seattle, WA 98101

STRENGTHS

- Problem-Solving**
Enthusiastically tackle challenges using creative technical solutions, resulting in more efficient workflows.
- Collaboration**
Work effectively within multidisciplinary teams, fostering trust and open communication.
- Adaptability**
Quickly adjust to new procedures and technologies, successfully managing multiple priorities along the way.
- Integrity**
Maintain reliability through transparent processes; respected by peers for genuine contributions and advice.
- Strategic Planning**
Effectively design resourceful plans geared towards maximizing operational efficiency and performance.

SKILLS

GitHub Jenkins PowerShell

Ansible Terraform

Cloud Computing

System Monitoring Automation

Security Compliance

DevOps Processes

Containerization

Incident Management

Deployment Automation

Test Automation

Integration Frameworks

SUMMARY

Detail-oriented DevOps & Tools Engineer with over 4 years of experience in automating application development and integration processes. Proven ability to configure and support cloud-based tools while ensuring compliance with security and audit systems. Skilled in leveraging DevOps methodologies to enhance operational efficiency and system performance. Strong background in application development enhances a comprehensive understanding of the DevOps pipeline and toolset. Excited to contribute my expertise at QODE, driving innovation and enhancing collaborative efforts.

EXPERIENCE

DevOps & Tools Engineer

Innovative Tech Solutions June 2022 - Present Camas, WA

Oversaw automation initiatives focusing on enhancing collaboration and streamlined development processes. Managed cloud configurations and enhanced operational workflows significantly, ensuring timely project execution.

- Collaborated with development teams to define and streamline application integration processes, enhancing workflow efficiency.
- Configured and supported cloud-based Atlassian tools, facilitating project management and collaboration across teams.
- Developed automated tools and processes that improved adherence to security and audit standards, reducing compliance risks.
- Implemented strategies to leverage existing DevOps tools, resulting in a meaningful increase in development speed.
- Monitored system performance and availability, ensuring alignment with service level agreements and operational objectives.
- Resolved incidents and alerts promptly, maintaining system integrity and minimizing downtime.

DevOps Engineer

NextGen Innovations April 2020 - May 2022 Plano, TX

Focused on deploying innovative solutions using leading-edge tools. Designed integration frameworks that bridged gaps between various development environments and ensured resource efficiency.

- Spearheaded the automation of deployment processes using GitHub and Jenkins, significantly reducing manual intervention.
- Utilized Ansible to manage system configurations, ensuring consistency and reliability across environments.
- Engaged in troubleshooting and issue resolution, enhancing the overall reliability of cloud-based applications.
- Assisted in the implementation of Terraform for infrastructure as code, streamlining resource management.
- Collaborated closely with application development teams to ensure seamless integration of DevOps practices.
- Conducted regular performance assessments and provided actionable insights to improve operational workflow.

Junior DevOps Engineer

Tech Innovations Group January 2019 - March 2020 Tampa, FL

Contributed to the foundational deployments and maintenance required for cloud applications; focused mainly on optimizing setups for better availability and stability.

MY CAREER

- DevOps & Tools Engineer at Innovative Tech Solutions (4.1 Years)
- DevOps Engineer at NextGen Innovations (2.1 Years)
- Junior DevOps Engineer at Tech Innovations Group (1.2 Years)

- Supported the deployment and maintenance of applications in a cloud environment, improving system uptime.
- Assisted in configuring CI/CD pipelines using Jenkins and GitHub, facilitating rapid application delivery.
- Participated in the development of automated testing processes, enhancing code quality and reliability.
- Engaged in the documentation of processes and configurations for team knowledge sharing.
- Contributed to team meetings by providing insights on improving operational efficiency and reducing bottlenecks.
- Developed scripting solutions using PowerShell to automate routine tasks, increasing team productivity.

LEADERSHIP & AWARDS

- Best Innovative Project Award from Innovative Tech Solutions
- Team Excellence Award from NextGen Innovations

EDUCATION

Bachelor of Science in Computer Science

University of Washington 🎓 GPA: 3.8 📅 2026 📍 Seattle, WA

Coursework: Data Structures, Algorithms, Systems Programming, Database Management

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) 📅 2023
- AWS Certified Solutions Architect – Associate 📅 2024

TECHNICAL SKILLS

- **Version Control Systems:** Git, GitHub
- **Continuous Integration:** Jenkins, CircleCI
- **Configuration Management:** Ansible, Puppet, Chef
- **Infrastructure as Code:** Terraform, CloudFormation
- **Cloud Service Providers:** AWS, Azure, GCP
- **Monitoring Tools:** Prometheus, Grafana, New Relic
- **Scripting Languages:** PowerShell, Python, Bash
- **Database Management Systems:** MySQL, PostgreSQL, MongoDB
- **Development Methodologies:** Agile, Scrum
- **Security Standards:** ISO/IEC 27001, NIST

PROFESSIONAL AFFILIATIONS

- Member of Local DevOps Chapter
- Volunteer at Tech Community Events
