STRENGTHS

- 👥 **Cross-Functional Leadership**
Coordinated diverse teams merging expertise effectively for comprehensive compliance efforts across varied projects.
- 🗣️ **Technical Presentation Skills**
Guided numerous seminars articulating intricate compliance themes, influencing audience perceptions significantly in understanding codes.
- 📌 **Regulatory Advocacy**
Actively promoted elevated standards through collaboration within industry councils, impacting future compliance developments positively.
- 🔗 **Knowledge Sharing**
Expected contributor to educational workshops, uplifting community skill levels regarding emerging compliance scenarios thoughtfully.
- 💡 **Mentoring and Growth**
Invested time in mentoring up-and-coming engineers; seeing their confidence bolster contextually amid challenging compliance climates.

Cross-Functional Team Leadership

SUMMARY

Engineering leader with over 15 years focused on codes and standards within data centers and direct current (DC) applications. Proven capability to strategize and execute compliance programs across the electrical and industrial sectors. An effective collaborator, engaging with teams to ensure that new products meet international safety standards while minimizing operational risks. Known for shaping industry practices through representation at meetings and councils. Consistently strive to develop technical insights shared through papers and seminars in this fast-evolving field.

EXPERIENCE

Director, Codes & Standards

Innovatech Solutions 📅 January 2021 - Present 📍 Raleigh, NC

Directly responsible for developing strategies ensuring compliance with electrical and industrial codes and standards, particularly for data center technology and DC systems. Accountable for collaborating across projects to validate product adherence to IEC, NFPA, and UL standards, thus enhancing safety benchmarks.

- Established frameworks oriented around regulatory compliance, addressing critical gaps in safety for data center systems.
- Interlinked with product development divisions to precisely interpret applicable codes, leading each initiative into successful implementation.
- Engaged actively in key industry events to influence standard-setting while representing company interests effectively.
- Authored knowledge-sharing materials presented during workshops focusing on compliance challenges encountered within the industry.
- Sustained mentorship for junior engineering professionals, enhancing the competence of the team concerning regulatory affairs within innovation contexts.
- Played a crucial role in outlining compliance protocols and strategies, driving improved decision-making processes regionally.

Senior Standards Engineer

ElectraTech 📅 June 2016 - December 2020 📍 Birmingham, AL

Oversaw creation of compliance documentation impacting electrical and DC systems, establishing alignment with international standards. The position involved assuring safety measures were met through innovative, regulatory-focused engineering solutions.

- Modified existing process workflows to advance any potential issues regarding compliance paradigms, saving valuable resources.
- Worked closely with validation teams performing rigorous tests to ensure the integrity of newly designed products.
- Conducted frequent training opportunities targeting engineers, increasing engagement and overall transparency with compliance initiatives.
- Facilitated dialogue with external organizations advocating groundbreaking advancements applicable to the data center sector.
- Documented critical findings as part of efforts contributing towards organizational publications within technical reviews.
- Instrumental in securing successful certifications for distinguished projects, positioning offerings strongly within market sectors.

Compliance Engineer

PowerGrid Technologies 📅 March 2012 - May 2016 📍 Atlanta, GA

Focused on supporting compliance with IEC and NFPA standards through collaboration with design teams. Contributed to audit processes that ensured safety benchmarks were consistently maintained across various electrical products under oversight.

LANGUAGES

MY CAREER

- Director, Codes & Standards at Innovatech Solutions (5.6 Years)
- Senior Standards Engineer at ElectraTech (4.5 Years)
- Compliance Engineer at PowerGrid Technologies (4.2 Years)

- Appraised design methodologies actively integrating compliance specs aligning accordingly with operational imperatives.
- Performed audits ensuring strict adherence to safety directives, subsequently reporting back results for organizational awareness.
- Facilitated groundwork preparing essential compliance submissions required for timely governmental authorizations.
- Represented company interests during pivotal industry gatherings, offering insight based on firsthand experiences facing complex regulations.
- Iteratively contributed content utilizing feedback channels intended for both internal training and external partnerships relating to regulation improvement.
- Developed thorough assessment criteria used to streamline problem-solving discussions in accordance with standing safety measures.

LEADERSHIP & AWARDS

- Certified Compliance Professional - 2020
- Project Management Professional - 2019

EDUCATION

Bachelor of Science in Engineering

University of North Carolina 🎓 GPA: 3.5 📅 2008 📍 Chapel Hill, NC

Coursework: Electrical Systems, Safety Compliance, Regulatory Affairs, Data Center Operations

CERTIFICATIONS

- Certified Compliance Professional 📅 2020
- Project Management Professional 📅 2019

TECHNICAL SKILLS

- **Standards Development Tools:** IEC, NFPA, UL
- **Compliance Documentation Systems:** Quality Control Manuals, Risk Assessment Templates, Audit Checklists
- **Testing and Validation Equipment:** Automated Testing Frameworks, Software Verification Tools, Compliance Assessment Platforms
- **Project Management Applications:** Trello, Microsoft Project, Asana
- **Technical Communication Tools:** Microsoft PowerPoint, Technical Writing Software, Content Management Systems
- **Regulatory Auditing Methods:** ISO Standards adherence, Internal Review Processes, Certification Negotiation Techniques
- **Training Methodologies:** Onboarding Programs, Workshop Facilitation, Webinars
- **Field Inspection Tools:** Monitoring Devices, Reporting Software, Assessment Platforms
- **Research and Development Protocols:** Laboratory Environment Controls, Field Test Planning, Pilot Studies
- **Industry Collaboration Networks:** Professional Associations, Government Liaison Groups, International Standards Organizations

PROFESSIONAL AFFILIATIONS

- Institute of Electrical and Electronics Engineers (IEEE)
- National Association of Compliance Professionals (NACP)
