

Omar Hunt

Electrical Engineer Intern

AUGUST 07, 2026

Hiring Manager
Watt & Co.
Richmond, VA

Dear Hiring Manager,

I am thrilled to apply for the Electrical Engineer Intern position at Watt & Co., as this opportunity perfectly aligns with my academic experience and burgeoning passion for innovative engineering solutions.

At Virginia Commonwealth University, I discovered my love for creating electrical designs, particularly while developing a lighting plan for a local community center, where I focused on energy efficiency and sustainability; it was exhilarating to see my work impact the community directly.

During my time as a research assistant, I engaged deeply with data modeling and simulation using MATLAB and AutoCAD, showcasing my ability to adapt quickly and think critically in fast-paced environments.

I have learned, through collaboration and hands-on projects, the value of meeting strict deadlines and ensuring code compliance, contributing to successful project outcomes while enhancing my skills in technical documentation and team communication.

I envision myself as a valuable member of the Watt & Co. team, working diligently alongside a group that prioritizes innovation and employee growth, as I truly believe in the significance of dynamic teamwork in engineering.

I look forward to the possibility of discussing this exciting opportunity.

Thanks,

Omar Hunt
