Hiring Manager
Greenfield Engineering Solutions
Philadelphia, PA

Dear Hiring Manager,

I am thrilled to apply for the Engineering Intern position at Greenfield Engineering Solutions, as I find immense joy in crafting innovative solutions shaped by civil engineering principles while addressing community needs and environmental essentials.

Greenfield's dedication to sustainable infrastructure resonates profoundly; it molds the community's future through prudent design choices, a mission that remarkably aligns with my aspirations as a Civil Engineering student ready to contribute meaningfully.

Amidst my endeavors at Harrisburg University, I am involved in projects spanning transportation and environmental sectors. For instance, I collaborated on a drainage solution that emphasized both functionality and eco-friendliness. It was not easy at first, wrestling with complex regulations and expectations, yet this experience bolstered my commitment to impactful engineering.

Simultaneously, my internship experience refined my AutoCAD skills, enabling me to draft plans and accurately present them to diverse audiences. Every interaction highlighted the importance of clear communication; I learned that ideas thrive through collaboration and attentive understanding, bridging technical knowledge and team dynamics.

I am eager to join Greenfield Engineering Solutions, where my skills can flourish within a team that prioritizes environmental stewardship. Building resilient infrastructure energizes me, as I envision a landscape where progress and sustainability coexist.

I appreciate your consideration of my application.

Thanks,

Kingston Thompson
