Cleveland, OH

Dear Hiring Manager

I am thrilled to apply for the Entry Level Civil Engineer (Renewables) position at GreenField Engineering, a role that not only aligns with my educational background but ignites my passion for sustainable infrastructure amidst society's pressing need for cleaner energy solutions.

During my time at EcoEnergy Solutions, I engaged proactively in multiple projects, one of which involved enhancing solar capacity by meticulously analyzing site data and collaborating with stakeholders to secure essential permits, resulting in a streamlined design approval process that saved valuable time and resources.

I cherish teamwork, ensuring clarity and cohesion among diverse groups while exchanging knowledge and fostering collective growth; this ethos has propelled project successes and nurtured long-lasting client relationships, making every hurdle a shared triumph.

An exciting field visit to an expansive site confirmed my enthusiasm for civil engineering within renewable sectors, where I faced challenges but effectively overcame uncertainties by applying hands-on insights and adaptability, which enabled precise recommendations about terrain suitability.

With a Bachelor's Degree in Civil Engineering and an Engineer in Training certification, I am equipped with skills in AutoCAD and stormwater management; my continuous training in geomatics adds to a strong foundation that promises the ability to contribute positively to your esteemed team.

Looking forward to discussing my potential contributions.

Thank you,

Odin Rangel
