Hiring Manager
GreenTech Solutions
Boston, MA

Dear Hiring Manager,

I am eager to submit my application for the Entry-Level Environmental Engineer position at GreenTech Solutions, where my fervent commitment to sustainability aligns wonderfully with your esteemed organization's goals while being a recent graduate from Harvard University with a Bachelor of Science in Environmental Engineering.

Collaboration has always fueled my ambitions, as each project I worked on exemplified team synergy and result-driven success; for instance, during my internship at a university research lab, I assisted a dedicated team in executing groundbreaking soil remediation projects, demonstrating my spirit as a proactive contributor who enjoys working alongside experienced engineers.

Throughout my academic experience, I faced challenges, such as mastering complex environmental regulations, which pushed me to delve deeply into research, ultimately preparing impactful reports that bridged theoretical concepts with practical applications in real-world environmental scenarios.

Moreover, my hands-on activities in environmental sampling and data analysis not only educated me about compliance but revealed the importance of precise communication, especially when relaying technical findings to peers and faculty members; these experiences have bolstered my keen interest and skills in this vital field.

I am thrilled at the prospect of contributing to diverse projects in challenging environments at GreenTech, where my enthusiasm for environmental science coupled with moxpertise in engineering design tools can truly make a difference in enhancing public safety and ecological sustainability in local communities.

Thank you for considering my application.

Sincerely,

Levi Le
