EXPERIENCE

Capstone Project Developer

University Project 📅 January 2026 - May 2026 📍 Atlanta, GA

Focused on optimizing nephrology patient care protocols through intensive research and analysis. Developed training programs to elevate staff expertise while emphasizing the importance of improving patient education strategies.

- Conducted thorough assessments of existing patient care practices, pinpointing areas needing enhancement.
- Implemented educational materials aimed at adjusting patient perceptions of treatment processes.
- Collaborated effectively with diverse teams to ensure comprehensive patient education strategies were adopted.
- Evaluated the success of initiated feedback channels to secure high levels of understanding among patients.
- Showcased research outcomes through a clear presentation to faculty and peers, earning recognition for impactful findings.
- Leveraged statistical analysis tools to support evidence-based changes in nursing approaches.

Research Assistant

Academic Research 📅 August 2025 - December 2025 📍 Atlanta, GA

Contributed to pivotal research examining the intersection of patient education and hemodialysis treatment outcomes, providing critical insights to enhance nephrology nursing protocols.

- Assisted in collecting detailed data regarding patient responses to educational programs about hemodialysis.
- Ensured high standards of accuracy and confidentiality during data processing while collaborating with medical professionals.
- Compiled research findings into meaningful presentations that fostered interactive discussions about innovative patient care solutions.
- Composed a thorough review on nephrology nursing literature, enriching the overall quality of the research outcomes.
- Participated in collaborative meetings emphasizing the exploration of challenges faced during the study.

- Developed strong teamwork abilities while forging vital partnerships across various healthcare disciplines.

Nursing Student Intern

Student Lab 📅 January 2025 - May 2025 📍 Atlanta, GA

Gained foundational experience in nursing practices focused on chronic kidney disease, supporting proficient patient care within a hands-on dialysis environment.

- Engaged directly with patients, aiding in medication administration and consistent monitoring throughout treatment regressions.
- Promoted proactive patient education tailored towards kidney health and available therapies, increasing adherence and engagement.
- Documented encounters meticulously in electronic health records, ensuring precise tracking of individual patient journeys.
- Simulated emergency conditions alongside peers to cultivate swift responsiveness in real-life scenarios.
- Fostered excellent professional relationships with supervising nurses who commended commitment to exemplary patient service.
- Regularly collaborated with fellow interns to develop essential caregiving strategies aligned with best practices.
