📍 Frankfort, KY 40601

### STRENGTHS

- 📍 **Field judgment**  
During difficult site visits, translated observations into practical actions that inspectors and facility operators could follow.
- 👥 **Staff coaching**  
Used field reviews and direct feedback to help newer inspectors gain confidence with cases and documentation.
- 🔧 **Regulatory clarity**  
Explained code findings in plain language, helping facilities respond without losing sight of public protection.
- 🚒 **Emergency coordination**  
When urgent calls arrived, organized information and assignments so partner teams could act with confidence.
- 📅 **Resource planning**  
Balanced workload, seasonal needs, and available coverage to keep inspection priorities moving in busy periods.

### SUMMARY

Environmental health professional with six years of experience across public health inspections, public facilities, regulatory enforcement, sanitation, hazardous materials, community programs, and emergency field response. More than two years of supervisory work includes staff scheduling, coaching, performance review, workload planning, quality review, protocol development, budget input, grant reporting support, and 24 hour on call response. Applies **environmental science** training to code interpretation, corrective actions, complex enforcement matters, **community needs assessments**, and multi agency coordination. Field work includes outdoor exposure, difficult access locations, emergency operations, and public communication with regulated facilities. Kentucky credentials include Registered Environmental Health Specialist or Sanitarian certification, **Hazardous Materials Responder** certification, and a valid **Kentucky driver's license**. Ready to contribute sound judgment, clear documentation, and practical resource allocation within public facilities programs.

### EXPERIENCE

#### Environmental Health Supervisor, Public Facilities

Commonwealth Environmental Services District 📅 July 2024 - Present 📍 Frankfort, KY

Supervises public facility field operations, staff assignments, enforcement reviews, on call response, and protocol improvements. Supports accurate records, sound decisions, and timely service across changing workloads.

- Directed public facility inspections, improving documented follow through across assigned field operations
- Scheduled staff workloads using inspection priorities, seasonal demands, and available coverage
- Reviewed complex code matters, supporting consistent **enforcement** decisions and clear facility communication
- Coached inspectors through field reviews, performance feedback, and practical protocol updates
- Coordinated **emergency response** assignments during after hours **public health** incidents
- Prepared budget input and grant **reporting** support for **environmental health** program needs

#### Senior Environmental Health Specialist, Regulatory Programs

Riverbend Public Health Collaborative 📅 January 2022 - June 2024 📍 Georgetown, KY

Handled senior environmental health work across inspections, complaints, code enforcement, **emergency response**, and community assessment. Mentored colleagues and strengthened documentation used for follow up and agency coordination.

- Led **environmental health** inspections that clarified corrective actions for regulated facilities
- Resolved complaint investigations through code review, site visits, and documented findings
- Coordinated emergency field response with partner agencies during urgent **public health** events
- Mentored newer specialists through case reviews, field coaching, and practical feedback
- Assessed community conditions, helping inform outreach priorities and resource discussions
- Improved case records through consistent follow up tracking and evidence review

#### Environmental Health Specialist, Sanitation Programs

Blue River Sanitation Services 📅 September 2020 - December 2021 📍 Shelbyville, KY

Conducted sanitary inspections, facility compliance reviews, complaint investigations, corrective action follow up, and preparedness activities. Built dependable field records while addressing varied site conditions and public concerns.

MY CAREER

- Environmental Health Supervisor, Public Facilities at Commonwealth Environmental Services District (2.2 Years)
- Senior Environmental Health Specialist, Regulatory Programs at Riverbend Public Health Collaborative (2.4 Years)
- Environmental Health Specialist, Sanitation Programs at Blue River Sanitation Services (1.2 Years)
- Public Health Inspection Associate, Field Practice at Kentucky Community Health Field Program (11 Months)

- Conducted sanitary inspections across facilities with varied operational and access conditions
- Documented compliance findings that gave operators clear corrective action direction
- Investigated public complaints through interviews, site observations, and regulatory review
- Tracked corrective actions until facilities supplied satisfactory follow up evidence
- Supported emergency preparedness activities through field documentation and response planning
- Explained sanitation requirements clearly during facility visits and community contacts

Public Health Inspection Associate, Field Practice

Kentucky Community Health Field Program 📅 September 2019 - August 2020 📍 Richmond, KY

Completed supervised environmental health inspections, science review, follow up tracking, outreach, and field practice. Developed an early foundation in sanitation, documentation, public communication, and regulatory service.

- Completed supervised **environmental health** inspections using established field procedures
- Applied **environmental science** coursework during sanitation observations and facility reviews
- Tracked inspection follow ups so unresolved findings received timely attention
- Prepared field documentation that supported supervisor review and regulatory decisions
- Participated in outreach conversations about practical **public health** protections
- Supported field teams during changing schedules, site conditions, and community needs

PROJECTS

Regional Emergency Environmental Response 📅 2025

Worked with field colleagues and partner agencies during response planning, sharing clear site information and practical assignments so urgent environmental concerns received coordinated attention.

Public Facility Protocol Review 📅 2024

Collaborated with inspectors to review facility protocols, compare field observations, and refine documentation practices that made follow up clearer for staff and operators.

LEADERSHIP & AWARDS

- Recognized by supervisors for dependable emergency response coverage and clear field documentation.
- Selected for expanded supervisory responsibilities after consistent coaching, workload planning, and case review support.
- Received professional recognition for practical communication with regulated facilities and community partners.

EDUCATION

Bachelor's Degree in Environmental Health

Eastern Kentucky University 🎓 GPA: 3.7 📅 2019 📍 Richmond, KY

**Coursework:** *Environmental Science, Public Health, Sanitation, Environmental Regulation*

CERTIFICATIONS

- Registered Environmental Health Specialist / Sanitarian, Kentucky 📅 2025
- Hazardous Materials Responder 📅 2025
- Kentucky Driver's License 📅 2026
