Hiring Manager
Innovate Engineering Solutions
Bakersfield, CA

Dear Hiring Manager,

I am thrilled to apply for the Facilities Engineering Intern position at Innovate Engineering Solutions, where my academic endeavors and aspirations intersect in an exciting manner with the rigorous demands of your esteemed firm, allowing me to contribute effectively to numerous impactful projects while growing my capabilities in a real-world context.

Innovate Engineering Solutions is not just a leader; it represents a paradigm shift in engineering, which resonates profoundly with my belief in crafting sustainable facilities, ensuring environmental harmony, while optimizing performance—this mission aligns seamlessly with my educational journey focused on civil engineering.

During my internship at the University Project, I collaborated closely with my peers to design a drainage system that encompassed sustainability and efficiency, showcasing our ability to work as cohesive units, while I conducted assessments leading to design recommendations, which solidified our commitment to excellence.

Participating in a hackathon recently, our team developed an innovative solar-powered water filtration system, presenting to judges who recognized our ingenuity, and such experiences enriched my adaptability, offering experiential learning that I can bring to your company.

Adapting to various challenges is critical; I faced hesitations during the project documentation processes, yet those moments of uncertainty transformed into opportunities for growth, shaping my collaborative spirit and keen insight into team dynamics.

Thank you for considering my application.

Sincerely,

Linh Wiggins
