

Abraham Hartman

Field Engineer

JULY 04, 2026

Hiring Manager
MEC Construction Group
Waltham, MA

Dear Hiring Manager,

I am excited to submit my application for the Field Engineer position at MEC Construction Group, a company renowned for its commitment to quality and innovation; my background in field operations and project management makes me a strong match for this role that thrives on teamwork and attention to detail.

While working as a Field Engineering Assistant, I took on numerous tasks, like planning schedules and coordinating with suppliers, ensuring everything came together smoothly; I even tackled minor technical issues, which taught me the importance of adaptability in construction.

During my academic experience as a Construction Management Research Intern, I collaborated with peers to explore cost control measures that could truly make a difference; presenting our findings was daunting at first, yet it ultimately showcased my ability to communicate effectively with both teams and stakeholders.

Furthermore, my voluntary role with Habitat for Humanity has equipped me with practical skills that extend beyond the classroom, emphasizing safety and community engagement, which I value deeply.

Thank you for considering my application.

Sincerely,

Abraham Hartman
