Hiring Manager  
Proton  
Geneva, IL

Dear Hiring Manager,

I am excited to submit my application for the Fullstack Applied AI Engineer position at Proton, where my experience in developing user-focused AI systems and my enthusiasm for privacy-centric technologies meet your innovative goals.

In my recent role at Tech Innovations Inc., I spearheaded several projects that demanded collaboration with designers and engineers, delivering high-performance applications that not only met user needs but also enhanced security protocols—something I find immensely rewarding.

With over 6 years of extensive experience, my focus has been on crafting solutions that pay attention to user privacy and security. Notably, through my efforts in designing backend infrastructures with Rust and optimized CI/CD pipelines, I achieved a 30% reduction in deployment time while ensuring robust service uptimes.

I face challenges head-on, and while implementing automated monitoring systems, there were moments of uncertainty, but learning from those experiences ultimately sharpened my problem-solving skills—a crucial aspect of delivering excellence within AI-driven projects.

Proton's commitment to cutting-edge, privacy-focused AI technology aligns perfectly with my passion. I am eager to contribute to a culture that values innovation and teamwork.

Thank you for considering my application.

Sincerely,

*Luka Bennett*
