Hiring Manager
WSP Engineering Solutions
Wexford, PA

Dear Hiring Manager,

I am thrilled to apply for the Geotechnical Engineering intern role at WSP Engineering Solutions, aligning perfectly with my academic pursuits and burgeoning enthusiasm in this specialty. This opportunity presents an exhilarating chance to deepen my understanding of geotechnical concepts while contributing meaningfully to your impressive endeavors in engineering.

Through rigorous projects in my studies, I discovered a passion for dissecting complex geotechnical challenges. Taking on roles where I conducted soil mechanics analyses, I learned vital lessons about the importance of precision and collaboration in engineering projects. This experience will serve as an excellent foundation as I transition to supporting your team's engineering tasks.

During my tenure as a Geotechnical Engineering Research Assistant, I successfully collaborated with faculty to craft compelling project proposals and drove the completion of vital documentation. Public speaking to peers became easier as I shared nuanced findings with an audience, further refining my skills in technical communication. My commitment to workplace safety combined with this technical acumen prepares me for the dynamic environment at WSP.

With a valuable experience in fieldwork and project management through my Civil Engineering studies, I am eager to learn and grow within your organization. I recognize areas where I can improve, like software proficiency. However, my unwavering enthusiasm for engineering and teamwork propels me forward, and I am ready to embrace challenges at WSP.

Thank you for considering my application.

Sincerely,

Milo Johnston
