Hiring Manager
Virtue Industries
Pennsylvania

Dear Hiring Manager,

I am eager to apply for the Junior Manufacturing Engineer position at Virtue Industries, a role that matches perfectly with my recent graduation from the University of Pennsylvania where I earned my degree in Biomedical Engineering, and reflects my aspiration to gain real-world experience while contributing to your innovative projects.

Virtue Industries captivates me with its dedication to advancing pharmaceutical manufacturing, and I believe my participation in a university project cements my qualifications through tangible engagement in process optimization and collaboration in labs, while embracing compliance with stringent GMP regulations.

I connect with your mission, and my hands-on experience in validating drug formulations while troubleshooting manufacturing intricacies and preparing Batch Manufacturing Records will deliver immediate benefits to your team as well as foster a culture of continuous improvement and regulatory excellence.

During my internship, I navigated pressing challenges like optimizing workflows while collaborating effectively with cross-functional teams; these experiences imparted valuable lessons about persistence, communication, and embracing the unexpected that I will carry forward in my professional journey.

Joining Virtue Industries would not just fulfill a career aspiration; it would provide a platform to channel my analytical skills and passion for life sciences into improving product quality, ultimately benefiting patient outcomes.

Thank you for considering my application.

Sincerely,

Harrison Wilker
