

Leo Singleton

Junior Python Developer

JUNE 13, 2026

TechFusion Labs
Hiring Manager
Chicago, IL

Dear Hiring Manager,

I am thrilled to apply for the Junior Python Developer position at TechFusion Labs, where my skills and enthusiasm for programming align splendidly with your innovative pursuit of excellence in technology and development.

Engaging with robust server-side applications ignites my passion, allowing me to integrate AI tools like GitHub Copilot, which truly elevates productivity and creativity in coding endeavors, fostering collaboration among talented peers.

During my tenure at CodeCrafters Inc., I expanded my expertise, developing effective Python applications that not only enhanced functionality but also created seamless user experiences; however, adapting to rapid changes at times posed challenges, yet I persevered.

Working closely with Docker for containerization, I improved deployment efficiency while participating in meaningful code reviews that reinforced team synergy and guaranteed adherence to best practices.

Moreover, my contributions at Data Innovations LLC demonstrated my readiness to tackle complex coding tasks and implement solutions that considered both performance and user satisfaction.

I look forward to discussing how my experiences can contribute to TechFusion Labs.

Sincerely,

Leo Singleton
