Lead Professional, Structural Engineering

JULY 06, 2026

Hiring Manager  
WSP Engineering Solutions  
Valhalla, NY

Dear Hiring Manager,

I am invigorated to express my interest in the Lead Professional, Structural Engineering position at WSP Engineering Solutions, where not only my background but my unwavering commitment to engineering excellence perfectly aligns with your dynamic team's goals.

This role demands seasoned expertise alongside leadership qualities, as I have cultivated during my tenure at Greenway Engineering Group, where I adeptly led collaborative teams driving projects from concept through execution under strict compliance.

My journey involved overseeing complex infrastructure projects that required both innovative approaches and rigorous adherence to standards; I've tackled challenging designs and rectified structural issues that previously stymied progress.

In previous roles, I utilized advanced structural modeling techniques while guiding junior engineers, ensuring effective communication that fostered a culture of growth— a blend that I believe resonates well with your commitment to team development.

I am excited about the prospect of contributing my structural knowledge and practical experiences toward enhancing your project outcomes, driven by a shared dedication to infrastructure integrity and innovation.

Looking forward to discussing how we can collectively elevate WSP Engineering Solutions.

Sincerely,

*Edwin Casey*
