STRENGTHS

- Analytical Thinker**
Translates intricate problems into actionable strategies, consistently delivering high-quality analytical insights.
- Collaboration Enthusiast**
Promotes teamwork through open communication; recognized for facilitating discussions that enhance group effectiveness.
- Innovative Solver**
Acts proactively in fast-paced environments, finding creative solutions to novel challenges affecting the project landscape.
- Results Oriented**
Maintains focus on achieving project outcomes, tirelessly pursuing improvement throughout development cycles.
- Effective Communicator**
Conveys complex ideas simplistically across multidisciplinary audiences; builds rapport that strengthens ongoing projects.

SKILLS

Machine Learning Data Analysis

Python TensorFlow PyTorch

Statistical Modeling

Predictive Analytics

Research Methodologies

LANGUAGES

English Native

Spanish Proficient

SUMMARY

Dedicated PhD candidate in Computer Science specializing in Machine Learning, driven by a passion for leveraging advanced algorithms to tackle complex financial challenges. Practical experience stems from hands-on research involving predictive modeling and algorithm optimization. Collaborated effectively with diverse teams, bridging theoretical research with real-world applications through robust data analysis. Strong programming skills in Python, along with proficiency in frameworks such as TensorFlow and PyTorch, support impactful project outcomes. Recognition includes publications in top-tier conferences like NeurIPS, showcasing commitment to the field and eagerness to make significant contributions at Tech Innovations.

EDUCATION

PhD in Computer Science

Boston University GPA: 4.0 2026 Boston, MA

Coursework: Machine Learning, Data Analysis, Algorithms, Statistical Methods

TECHNICAL SKILLS

- Machine Learning Frameworks:** TensorFlow, PyTorch
- Programming Languages:** Python, R
- Statistical Techniques:** Regression, Time-Series Analysis, Classification
- Data Management Tools:** SQL, Pandas, NumPy
- Visualization Tools:** Matplotlib, Seaborn
- Research Methodologies:** Quantitative, Qualitative, Mixed Methods
- Version Control Systems:** Git, GitHub
- Cloud Computing Services:** AWS, Google Cloud Platform
- Development Practices:** Agile, Scrum, Kanban
- API Development:** REST, GraphQL

EXPERIENCE

Machine Learning Research Assistant

University Research Lab September 2024 - Present Cambridge, MA

Supported machine learning innovations through research aimed at financial applications, focusing on the development and deployment of effective models. Fostered collaboration among researchers, presenting distinct methodologies combining academic exploration with practical insights within the financial sector.

- Conducted extensive research to develop hedge fund trading models that improved prediction accuracy significantly.
- Collaborated extensively with fellow researchers, resulting in the publication of findings in NeurIPS 2025 - enhancing professional reputation.
- Described technical concepts clearly in presentations, earning acclaim during academic seminars.
- Executed experiments utilizing TensorFlow and PyTorch, refining model performance under various scenarios while ensuring robustness.
- Mentored undergraduate students, simplifying complex machine learning principles and fostering a collaborative learning environment.
- Optimized workflows for preprocessing financial datasets, leading to improvement in overall model readiness.

Capstone Project Developer

Academic Innovations Inc. January 2024 - May 2024 Boston, MA

Served as team lead for a simulation-based capstone project, aligning machine learning techniques with trading strategies to elevate trading efficiency indicators. Promoted teamwork and innovation throughout the project's lifecycle.

MY CAREER

● Machine Learning Research Assistant at University Research Lab (1.8 Years)

● Capstone Project Developer at Academic Innovations Inc. (4 Months)

- Championed integration of machine learning technology in simulated financial trading environments, demonstrating tangible benefits through enhanced trading behaviors.
- Led assessments using advanced statistical methods, providing insights into model efficacy that drove critical improvements.
- Developed interactive visualizations, bridging communication gaps and clarifying objectives with stakeholders beyond technical backgrounds.
- Facilitated impactful reviews and iterations based on peer input, cultivating an adaptive approach in project execution.
- Participated in university tech expos, explicating innovative solutions for algorithmic trading preparation.
- Documented project experiences comprehensively, establishing best practices for future endeavors.

LEADERSHIP & AWARDS

- NeurIPS Best Paper Award - 2025
- Dean's List - Boston University, 2024

CERTIFICATIONS

- Machine Learning Specialization 📅 2025
- Data Science Professional Certificate 📅 2025

PROFESSIONAL AFFILIATIONS

- President, Computer Science Graduate Student Association, Boston University
- Member, AI Research Group, Boston University
