STRENGTHS

- Analytical Problem-Solver**
Excel in dismantling complex problems, creating actionable strategies that drive outcomes. Recently turned challenging data sets into insightful analyses.
- Effective Communicator**
Articulated technical concepts through presentations that resonate with both technical and non-technical audiences. Cultivated greater engagement during discussions.
- Collaboration Advocate**
Foster strong teams by encouraging open communication and idea-sharing, leading projects to enriching results through collective efforts.
- Research Focused**
Deep commitment to applying machine learning in practical scenarios—driven by curiosity and the pursuit of breakthroughs in technology fields.
- Creative Thinker**
Generate refreshing ideas and solutions for challenging issues, striving for uniqueness and efficiency in deliverables.

SKILLS

Python SQL R Machine Learning

Natural Language Processing

Statistical Analysis

Data Visualization

Cloud Computing A/B Testing

LANGUAGES

English

Native

SUMMARY

PhD candidate specialized in Machine Learning and Data Science, actively involved in research that utilizes advanced statistical methods and algorithms. Hands-on experience gained through academic projects focused on travel analytics shows unique capacity to convert complex data into understandable insights. Effective communicator able to present findings engagingly, ensuring clarity for diverse audiences. Eager to apply analytical skills at Tech Innovators LLC and contribute innovative solutions to enhance user experiences and meet business objectives successfully.

EDUCATION

PhD in Computer Science

Tech Innovations University GPA: N/A 2025 Champaign, IL

Coursework: Algorithms, Machine Learning, Data Mining, Statistical Analysis

TECHNICAL SKILLS

- Programming Languages:** Python, SQL, R
- Machine Learning Techniques:** Regression, Neural Networks, Deep Learning
- Statistical Tools:** A/B Testing, Feature Engineering, Data Preprocessing
- Data Management:** ETL Processes, Data Warehousing, Database Design
- Cloud Platforms:** AWS, Google Cloud, Azure
- Data Visualization Tools:** Tableau, Power BI, Matplotlib
- Communication Tools:** Slack, Microsoft Teams, Zoom
- Version Control Systems:** Git, SVN, GitHub
- Documentation Standards:** IEEE, APA, Chicago
- Project Management Frameworks:** Agile, SCRUM, Waterfall

EXPERIENCE

Machine Learning Research Assistant

University Research Lab August 2024 - Present Champaign, IL

Support various research initiatives focusing on machine learning methodologies and applications in travel analytics within an academic environment. Collaborate closely with faculty and students, driving innovation and contributing to knowledge advancement.

- Conducted research utilizing machine learning algorithms to optimize data processing in travel analytics.
- Developed and implemented statistical models, achieving significant improvements in predictive accuracy.
- Collaborated on a project analyzing travel data, resulting in improved algorithm performance for customer recommendations.
- Used Python and SQL for data manipulation and analysis, enhancing data-driven decision-making processes.
- Presented findings to faculty and peers, simplifying complex methodologies for broader understanding.
- Contributed to the publication of research papers in reputable journals, highlighting innovative solutions in machine learning.

Capstone Project Developer

Tech Innovations University January 2024 - May 2024 Champaign, IL

Led a team focused on the creation of predictive models centered on travel user behavior. Engaged with industry professionals to ensure alignment with market trends and user needs.

- Led a team in developing a predictive model for analyzing travel user behavior, utilizing Python and R for implementation.

MY CAREER

● Machine Learning Research Assistant at University Research Lab (1.8 Years)

● Capstone Project Developer at Tech Innovations University (4 Months)

- Conducted feature engineering and data preprocessing to enhance model accuracy, resulting in a 30% increase in prediction reliability.
- Applied A/B testing methodologies to validate model effectiveness, presenting results in an accessible format to stakeholders.
- Engaged with industry mentors to refine project goals and align outcomes with market needs.
- Utilized cloud computing resources to manage large datasets efficiently, fostering a robust analytics framework.
- Received commendation for innovative approach to problem-solving and collaborative teamwork during project presentations.

LEADERSHIP & AWARDS

- Dean's List, Tech Innovations University, 2023
- Best Research Project Award, Machine Learning Conference, 2024

CERTIFICATIONS

- Data Science Professional Certificate 📅 2025
- Machine Learning Foundations: A Case Study Approach 📅 2025

PROFESSIONAL AFFILIATIONS

- Member, AI and Machine Learning Society, Tech Innovations University
- Volunteer, Local Community Tech Workshops, 2025
