SUMMARY

Motivated individual with a strong work ethic, eager to contribute in a manufacturing role at MCC Industries. Possesses solid computer, math, and reading skills essential for monitoring production quality and precision. Emphasizes safety and compliance while maintaining high operational standards. Committed to teamwork, actively collaborating with peers to improve processes and enhance productivity. Experience includes hands-on participation in quality assurance and workflow analysis, showcasing ability to manage tasks efficiently under pressure. Ready to engage fully in fast-paced environments, ensuring effective production outcomes that align with company goals.

EDUCATION

Bachelor of Science in Manufacturing Engineering
California State University, Sacramento GPA: 3.5
Coursework: Manufacturing Processes, Quality Control, Safety Standards, Production Scheduling

2026
Sacramento, CA

TECHNICAL SKILLS

- Manufacturing Tools:** CNC Machines, Fabrication Equipment, Assembly Line Techniques
- Quality Management Systems:** ISO 9001, Six Sigma, Statistical Process Control
- Safety Regulations:** OSHA Standards, Risk Assessment, Emergency Protocols
- Computer Software:** Microsoft Office, AutoCAD, SolidWorks
- Production Scheduling Tools:** MRP Systems, ERP Solutions, Just-In-Time Inventory
- Data Analysis Tools:** Excel, Tableau, SQL
- Lean Manufacturing Principles:** Kaizen, 5S System, Value Stream Mapping
- Technical Documentation:** Work Instructions, SOPs, Production Reports
- Collaboration Tools:** Trello, Microsoft Teams, Slack
- Research Methodologies:** Qualitative Analysis, Case Studies, Data Collection Techniques

SKILLS

- | | | | |
|-------------------------|---------------------------|--------------------------|-------------------------|
| • Basic Computer Skills | • Data Entry | • Documentation Accuracy | • Reading Comprehension |
| • Quality Assurance | • Problem Solving | • Operational Support | • Workflow Efficiency |
| • Team Collaboration | • Effective Communication | • Machinery Maintenance | • Inspection Techniques |
| • Safety Compliance | • Production Planning | • Mathematics Basics | • Training Development |

EXPERIENCE

Manufacturing Process Analyst
University Project

January 2026 - Present
Remote

Dynamic role focusing on analyzing and improving production workflows while ensuring compliance with safety standards. Contributed to process documentation and quality checks, providing critical support for enhancing campstone projects.

- Collaborated within a team to refine manufacturing operations toward heightened efficiency and safety.
- Created comprehensive process documentation aiding future project implementations and training.
- Performed detailed quality assurance checks, promoting adherence to established specifications across implementations.
- Developed a training manual highlighting key safety protocols, influencing new hire efficiency and safety awareness.
- Executed data entry tasks for accurate record maintenance concerning project metrics and outcomes.
- Initiated troubleshooting sessions aimed at addressing issues impacting production rates.

Quality Control Assistant
Student Lab

September 2025 - December 2025
Sacramento, CA

Engaging position providing support during manufacturing simulations focusing on quality aspects while honoring safety practices. Strengthened practical skills related to inspection processes and lab organization.

- Assisted with crucial quality inspections of lab-based manufacturing simulations, ensuring real-world applicability of learned methodologies.
- Engaged in discussions post-lab about performance outcomes, fostering collaborative idea generation for improvement.
- Maintained lab equipment cleanliness, promoting safety and organization throughout the workspace.
- Partnered with peers for data gathering relating to material performance analysis during lab tests.
- Presented test findings during group reviews, enhancing public speaking capabilities in academic settings.

- Utilized time management techniques effectively to prioritize multiple tasks during busy lab days.

Manufacturing Safety Researcher

January 2025 - May 2025

Academic Research

Sacramento, CA

Analytical role conducted influenced research projects centered on safety measures in manufacturing environments. Focused on peer presentations and circumstances-driven outcomes.

- Delimited safety trends through organizational research, contributing insights to faculty for enhanced protocols.
- Synthesized data reflecting safety compliance while recommending actionable strategies for process enhancement.
- Drafted impactful research papers shedding light on compliance practices used at industry benchmarks.
- Collaboratively gathered insights from manufacturing professionals, solidifying a network of industry expertise.
- Expounded upon the importance of collaboration in maintaining workplace safety through coordinated efforts and communication.
- Demonstrated public speaking skills by presenting findings at collegiate symposiums, directly engaging audience inquiries.

LEADERSHIP & AWARDS

- Excellence in Academic Research Grant Recipient
- Outstanding Contribution to Group Projects Award

CERTIFICATIONS

- Certified Manufacturing Technician 📅 2025
- OSHA Safety Certification 📅 2025

PROFESSIONAL AFFILIATIONS

- Society of Manufacturing Engineers Member
- Engineering Club Leadership Alumni

LANGUAGES

- English (Native)
- Spanish (Intermediate)
