Hiring Manager
Fictional Foods Inc.
Chicago, IL

Dear Hiring Manager,

I am thrilled to apply for the Manufacturing and Engineering Associate Internship at Fictional Foods Inc. This opportunity matches my technical skills and ambition precisely. I want to enhance food production processes while collaborating with your bold thinkers.

During my capstone project, I developed a sustainable food product manufacturing process. The goal was to optimize efficiency. We reduced waste by 15%, leading to lower production costs. This experience ignited my passion for innovation in manufacturing.

Being a proactive participant in the Student Innovation Lab taught me valuable lessons. I led sessions focused on automating packaging. Working with industry tools enabled hands-on learning, enhancing both technical capabilities and collaboration within our team.

I sometimes worry about mastering every detail. Yet, collaborating with various teams has grown my confidence. I enjoy problem-solving while fostering synergy among diverse individuals. This essence aligns perfectly with your company's mission.

I am eager to join your dynamic team, transforming ideas into reality while promoting sustainable practices. Together, we can create beloved food products that satisfy consumer needs and enhance operational excellence.

Thank you for your consideration.

Sincerely,

Nevaeh Gross
