EXPERIENCE

Medical Assistant Intern

January 2026 - June 2026

University Project

Denver, CO

Supported patient care initiatives through hands-on activities focused on vital sign monitoring and medication assistance in a simulated clinic environment. This role included working directly with peers to promote the well-being of individuals requiring additional support.

- Assisted with monitoring vital signs and managing medications in controlled practice environments.
- Provided companionship, ensuring comfort and promoting dignity during daily living activities.
- Collaborated creatively with team members for effective meal preparation and light housekeeping tasks.
- Documented care plan tasks and outcomes in a digital application, enhancing efficiency.
- Engaged in structured role-playing to improve patient interaction skills and communication effectiveness.
- Evaluated peer performance in caregiving, providing insightful feedback and fostering improvement.

Medical Assistant Student

September 2025 - December 2025

University Research Lab

Denver, CO

Conducted critical research on in-home care methodologies emphasizing the effectiveness of support systems available to elderly patients. Assisted in compiling data and developing informational resources for family caregivers.

- Participated in valuable research focusing on improving in-home patient care for senior citizens.
- Collected and analyzed data on health outcomes and patient satisfaction metrics.
- Created educational materials aimed at empowering families to manage their loved ones' health.

- Facilitated practical mock assessments with peers to simulate real-life caregiver situations.
- Maintained detailed records of research processes, ensuring accuracy and compliance.
- Presented findings to peers and faculty, enhancing understanding around patient advocacy.

Healthcare App Developer

March 2025

Hackathon Project

Denver, CO

Worked collaboratively on designing an innovative mobile application that streamlined patient scheduling and improved cross-communication efficiency between healthcare providers and clients.

- Contributed to the design process of a transformative app focused on enhancing patient engagement.
- Implemented user-friendly features for medication reminders and appointment alerts.
- Led rigorous user testing sessions that provided essential feedback for iterative improvement.
- Successfully presented final project outputs, gaining recognition for application's usability.
- Actively communicated with healthcare professionals to ensure practical application of features.
- Documented key development milestones to reflect entire project journey.

LEADERSHIP & AWARDS

- Outstanding Project Contributor Award for Healthcare Initiatives
- Exemplary Leadership Recognition in Community Service
