Hiring Manager
Quest Diagnostics
Farmington Hills, MI

Dear Hiring Manager,

I am eager to apply for the Medical Laboratory Scientist II role at Quest Diagnostics. This opportunity aligns with my fervent desire to provide quality healthcare while utilizing my clinical expertise in a meaningful way. Every test I conduct matters deeply, impacting the lives of numerous patients.

Working for Lakeside Medical Center, I independently performed high-complexity procedures, ensuring strict adherence to quality standards. Each day would present a new challenge, yet my dedication to continuous learning guided me through. I strive to improve efficiency, achieving a reduction in test turnaround time by 20%, a feat that enhanced patient outcomes significantly. Problem-solving feels instinctive; it's exhilarating!

In my tenure, I trained new laboratory staff, shepherding them toward proficiency and collaboration. This experience taught me the value of quiet leadership; small, supportive actions resonate widely within a team. I genuinely believe efforts to perfect procedures translate to better services.

Quality control remains a cornerstone of my practice. I consistently comply with contemporary regulatory standards including CLIA and HIPAA, nurturing an environment of safety and accuracy. My keen awareness of potential improvements enables me to tackle unseen discrepancies, bolstering organizational effectiveness.

Thank you for considering my application. I look forward to discussing how my background, skills, and enthusiasm align with the needs of your team.

Sincerely,

Mya Barton
