SUMMARY

Experienced Medical Laboratory Scientist with over 4 years dedicated to clinical laboratory work. Proven proficiency in performing high-complexity tests, consistently applying independent judgment required for complex procedures. Actively support quality control and documentation while training new staff members to foster a collaborative team environment. Problem-solving skills leveraged to troubleshoot equipment efficiently, enhance operational flow, and maintain high standards of safety and regulatory compliance. Eager to contribute to dynamic laboratory settings, driving improvements in patient care through precise testing and adherence to quality protocols.

EXPERIENCE

Medical Laboratory Scientist

Lakeside Medical Center 📅 June 2022 - Present 📍 Detroit, MI

Oversee high-complexity lab testing, ensuring rigorous adherence to protocols. Responsible for maintaining instruments and building workflow efficiencies.

- Conduct high-complexity laboratory tests independently, ensuring adherence to established protocols and quality standards.
- Troubleshoot and maintain laboratory instruments, achieving a notable reduction in downtime through proactive maintenance.
- Train and mentor new laboratory staff, enhancing team competency and efficiency in essential test procedures.
- Implement process aspects that reduced test turnaround time significantly, positively impacting patient care.
- Maintain meticulous records of test results and strict compliance with relevant regulations including CLIA and HIPAA.
- Collaborate extensively with interdisciplinary teams to improve laboratory services and patient outcomes.

Laboratory Technician

Riverbend Hospital 📅 March 2020 - May 2022 📍 Warren, MI

Engaged in diverse laboratory tasks with escalating complexity while adhering strictly to all safety and quality protocols.

- Assisted in various laboratory tests, ensuring uncompromising compliance with all applicable safety and quality regulations.
- Achieved skill proficiency across multiple laboratory instruments, positively influencing departmental productivity.
- Actively participated in the quality control processes, diligently documenting and addressing discrepancies in results.
- Facilitated training for incoming employees, establishing an atmosphere conducive to collaboration and efficiency.
- Contributed meaningfully to the creation of updated laboratory protocols that enhanced specimen processing.
- Maintained continuous education endeavors to remain knowledgeable about advances in laboratory technology.

Laboratory Assistant

Greenwood Lab Services 📅 January 2019 - February 2020 📍 Southfield, MI

Supported core laboratory functions and committed to standardizing operational integrity within the lab environment.

- Prepared samples effectively while ensuring functionality and readiness of all necessary laboratory equipment.
- Promoted cleanliness and organization within the laboratory setting, adhering to all health and safety principles.

STRENGTHS

Problem Solving

Leveraged data analysis tools to resolve testing discrepancies swiftly, saving valuable time and resources.

Collaboration

Fostered a supportive team environment where peers regularly sought guidance on procedures and complex tests.

Innovation

Implemented inventive approaches to specimen handling that enhanced data accuracy and turnaround speed.

Attention to Detail

Conscientiously monitored procedures to prevent errors while exceeding compliance expectations.

Communication

Effectively communicated findings to staff and management to facilitate informed decision-making.

SKILLS

Laboratory Information Systems

Quality Control and Assurance

Clinical Testing and Analysis

Instrument Maintenance

Data Management

Regulatory Compliance

Diagnostic Equipment Calibration

Specimen Processing Techniques
