

# WALKER ESCOBAR

## NETWORK DEVELOPMENT ENGINEER INTERN

📞 (310) 555-1234 ✉️ walker.escobar@example.com

🌐 [linkedin.com/in/walkerescobar](#) 📍 123 Main St, Los Angeles, CA 90001

### STRENGTHS

- 👥 Collaboration**  
Building environments thrives on peer collaboration. Frequently contributed ideas to achieve shared objectives across teams.
- 💡 Problem Solving**  
Strong aptitude for troubleshooting ambiguous challenges was valued in fast-paced team settings. Led initiatives to diagnose network issues efficiently.
- 🔗 Technical Proficiency**  
Skilled in scripting within Unix/Linux systems demonstrates practical capabilities vital for project success.
- 💬 Communication**  
Articulating complex ideas clearly enabled strong stakeholder engagement and effective project presentations.
- 🔄 Adaptability**  
Navigating various project dynamics taught importance of flexibility in roles and responsibilities for meaningful progress.

### SKILLS

- [Linux](#) [Python](#) [Perl](#) [JavaScript](#)
- [BGP](#) [OSPF](#) [Git](#) [Network Design](#)
- [Automation](#) [Documentation](#)
- [Agile Methodologies](#)
- [Problem Solving](#)
- [Network Standards](#)
- [Deployment Processes](#)

### SUMMARY

Dedicated Computer Science student passionate about network automation and performance. Developed solutions enhancing deployment speed in collaborative environments. Skilled in scripting (Python, Perl) within Unix/Linux contexts and implementing efficient network standards. Proven ability to work interactively with stakeholders throughout project lifecycles. Focused on delivering high-quality results that maintain compliance with established protocols. Whether through academic or hands-on projects, a commitment to advancing skills in networking fundamentals is clear.

### EDUCATION

#### Bachelor's Degree in Computer Science

University of California, Los Angeles 🎓 GPA: 3.8 📅 2027 📍 Los Angeles, CA

**Coursework:** *Networking, Systems Programming, Database Management, Web Development*

### TECHNICAL SKILLS

- Scripting Languages:** Python, Perl, JavaScript
- Networking Technologies:** BGP, OSPF, IP Networking
- Version Control Systems:** Git, SVN
- Documentation Tools:** Markdown, Confluence, Wiki
- Operating Systems:** Linux, Ubuntu, CentOS
- Development Frameworks:** Django, Flask
- Project Management:** Agile, Scrum, Waterfall
- Network Security:** Firewall, VPN, IDS/IPS
- Virtualization Platforms:** VMware, VirtualBox, KVM
- Cloud Services:** AWS, Azure, Google Cloud

### EXPERIENCE

#### Network Automation Developer

University Project 📅 January 2026 - Present 📍 Remote

Focused on developing automated deployment tools for network infrastructure using Python. Enhanced deployment efficiency while ensuring adherence to best practices in network management. Actively participated in teamwork, fostering collaboration among peers for better outcomes.

- Created an automated deployment tool increasing deployment speed by 30%.
- Collaborated to establish network standards documentation, ensuring compliance with industry protocols.
- Conducted thorough testing of configurations in simulations, improving reliability before real-world application.
- Delivered project findings to faculty, earning recognition for comprehensive presentations and insights.
- Assisted in troubleshooting network issues during hackathons, boosting participant satisfaction.
- Used Git for version control, streamlining collaboration and project updates among team members.

#### Linux Systems Intern

University Research Lab 📅 September 2025 - December 2025 📍 Los Angeles, CA

Scripting Languages

Troubleshooting

## LANGUAGES

English Native

Spanish Proficient

## MY CAREER

● Network Automation Developer at University Project (6 Months)

● Linux Systems Intern at University Research Lab (3 Months)

Supported administration of Linux servers managing resources for academic research and experimentation. Contributed to improving server efficiency through scripting and problem-solving methodologies.

- Managed Linux servers underlying several academic projects, focusing on security and functionality.
- Automated routine tasks via Bash and Python scripts, cutting down manual workloads significantly.
- Collaborated with researchers leading to successful publication details regarding network performance.
- Addressed user connectivity issues proactively to enhance accessibility and experience of lab users.
- Engaged effectively in weekly discussions contributing insights on ongoing enhancements.
- Documented all processes related to server management creating a reference resource for incoming interns.

## Network Solutions Team Member

Hackathon Project 📅 April 2025 📍 Remote

Contributed as part of a team designing an innovative prototype network management application aimed at small businesses. Focused on real-time analytics on network operations and responsiveness based on hands-on interaction.

- Developed key application features using JavaScript facilitating real-time network performance monitoring.
- Effectively showcased the application during competitions, receiving feedback for continued improvement.
- Led user testing efforts structuring design adjustments based on user input, clarifying requirements.
- Implemented Agile practices to assure timelines met alongside efficient deliverables.
- Celebrated for teamwork showcasing both individual contributions and overall project success.
- Secured second place highlighting technical capacity and cooperative planning.

## LEADERSHIP & AWARDS

- UCLA Dean's List
- Hackathon Best Prototype Award

## CERTIFICATIONS

- CompTIA Network+ 📅 2026
- Cisco Certified Network Associate (CCNA) 📅 2026

## PROFESSIONAL AFFILIATIONS

- Member of ACM (Association for Computing Machinery)
- Volunteer, Code.org

## ADDITIONAL INFORMATION

**Work Status** : Authorized to work in United States. No sponsorship required.
