 - Adaptive Equipment Training

EXPERIENCE

Pediatric Physical Therapy Intern
University Research Lab

June 2025 - Present
Fort Worth, TX

Intern role focusing on individualized pediatric therapy services, supporting assessment, treatment planning, and family engagement. Actively participate in therapy sessions and interprofessional collaboration for enhanced patient outcomes.

- Collaborated with a team of therapists to create individualized treatment plans, enhancing children's mobility and functional outcomes.
- Conducted assessments and documented patient progress, adhering to best practices in pediatric therapy.
- Engaged families during sessions, providing training on exercises and adaptive equipment use to improve home carryover.
- Assisted in community outreach programs educating families about the benefits of pediatric physical therapy.
- Participated in interdisciplinary meetings coordinating patient care, sharing insights on progress to ensure collaborative support.
- Presented novel pediatric therapy techniques at departmental workshop, contributing to team growth and practice enhancement.

Physical Therapy Project Developer
Student Innovation Lab

September 2024 - May 2025
Arlington, TX

Developed innovative project addressing children's gross motor skill development; conducting pilot sessions to gauge effectiveness and involving family participation.

- Created engaging therapy activities aimed at improving gross motor skills; successful pilot sessions yielded increased child participation.
- Evaluated various therapeutic tools and methods, presenting findings to faculty demonstrating impacts on therapy outcomes.
- Collaborated on comprehensive reports detailing family involvement, emphasizing its importance in effective therapy.
- Facilitated workshops for parents teaching integration of therapy activities into daily routines for improved results.
- Recognized for creative approaches in pediatric care during academic presentations, demonstrating innovation in practice.

Child Development Research Assistant
Capstone Project

January 2024 - August 2024
Dallas, TX

Supported research assessing physical therapy's impact on children with cerebral palsy, involved in data analysis and community engagement for holistic understanding and publication.

- Assisted in researching physical therapy effects on mobility in cerebral palsy patients, gathering critical data for publications.
- Engaged families to gather qualitative feedback on therapy experiences, enriching overall research insights.
- Contributed to designing adaptive equipment ensuring usability meets each child's unique needs.
- Presented significant research findings at local conferences, receiving commendations from professionals in the field.
- Partnered with faculty members to publish work highlighting early intervention significance in pediatric therapy.
