EXPERIENCE

Physical Therapy Intern

University Project 📅 January 2025 - May 2026 📍 Chicago, IL

Supported patient recovery efforts within a supervised clinical environment. Delivered targeted physical therapy interventions while maintaining high standards of patient care and operational efficiency. Demonstrated critical thinking when crafting individualized rehabilitation plans based on evolving assessments.

- Provided direct patient care focused on tailored rehabilitation methods.
- Constructed personalized treatment plans guided by patient evaluations and department standards.
- Applied evidence-based practices enhancing mobility and overall physical function.
- Partnered with healthcare professionals for unified patient support and effective communication.
- Recorded patient outcomes meticulously, reflecting accuracy in documentation.
- Organized workshops highlighting rehabilitation techniques for patients and families.

Research Assistant

Academic Research 📅 September 2024 - December 2025 📍 Chicago, IL

Contributed actively to numerous research initiatives aimed at understanding physical therapy's impact on patient outcomes. Focused on literature reviews, data collection, and patient interactions to inform ongoing studies for progressive treatments.

- Facilitated ongoing research examining methodologies related to patient recovery processes.
- Conducted thorough literature analyses that supported ethical experimental frameworks.
- Engaged directly with participants during interviews to capture insightful qualitative data.
- Collaborated with leading faculty members showcasing findings at academic forums.

- Dove into regulatory compliance topics informing best practices in context.
- Produced educational materials promoting insights gathered from research activities.

Team Lead

Capstone Project 📅 January 2026 - April 2026 📍 Chicago, IL

Spearheaded a team initiative focused on innovative rehabilitation approaches for elderly patients. Executed detailed patient assessments leading to practically beneficial interventions improving healthcare delivery methods.

- Orchestrated developmental steps for an innovative geriatric rehabilitation program.
- Evaluated patient needs comprehensively and structured adaptable intervention protocols.
- Utilized multiple therapeutic modalities fostering patient participation and enthusiastic recovery efforts.
- Exhibited project results effectively in presentations aligning with academic objectives.
- Drafted extensive reports showcasing methodologies and patient response to treatment.
- Cultivated collaborative dynamics among team members aiming for project success.
