Hiring Manager
CardioCare Health Systems
Oklahoma City, OK

Dear Hiring Manager,

I am enthused to express my interest in the Cardiothoracic Surgery Physician Assistant position at CardioCare Health Systems. My five years of experience align well with your expectations, particularly my specialization in Endoscopic Vein Harvesting, where I successfully improved procedural efficiencies while ensuring optimal patient safety.

Working in surgical wards has shown me the value of collaboration. At the University Project, I engaged closely with surgical teams, cultivating operational processes that maximized patient outcomes. This role helped me refine my skills and nurture my commitment to delivering excellent care within the community.

My academic endeavors further enhanced my capabilities. In my Clinical Research Internship, I focused on assessing surgical efficacy. Collaborating with classmates and healthcare professionals, I contributed to project success and gained recognition for outstanding presentations, deepening my dedication to continuous learning and improvement.

While my journey has been rewarding, some instances challenged my confidence directly. Yet, these experiences sparked resilience and growth within me. I recognize how vital it is to maintain proper balance, which is why I appreciate CardioCare's emphasis on fostering professional relationships alongside personal well-being.

As I seek to become a part of your esteemed team, I bring a robust foundation in cardiothoracic surgery coupled with a strong heart for patient advocacy. I am eager to contribute to your mission of exceptional healthcare delivery and would love the chance to discuss how my background aligns with your goals further.

Thank you for considering my application.

Sincerely,

Emily Hamilton
