

Kingston Nguyen

Principal DevOps Engineer

JULY 07, 2026

TechWorks Solutions
Hiring Manager
Auburn Hills, MI

Dear Hiring Manager,

I am excited to apply for the Principal DevOps Engineer role at TechWorks Solutions, a position that perfectly aligns with my 5+ years of experience in software development, shaped by a commitment to innovate and improve workflows in cloud environments.

Leading design projects, I transformed CI/CD pipelines at CloudTech Innovations, boosting deployment efficiency by 30%, while also integrating compliance checks seamlessly into workflows, reflecting my ongoing passion for crafting cohesive DevOps solutions.

In a previous role, I witnessed firsthand the impact of mentoring junior engineers, where imparting knowledge not only increased their capabilities but invigorated the team's morale, driving home the importance of collaboration in technological advancements.

Navigating the complexities of containerization with Docker and Kubernetes taught me how to architecture scalable apps effectively, providing responsive solutions to business needs while adhering to best security practices.

This position represents a thrilling opportunity to leverage my comprehensive experience in DevSecOps, ensuring that technical practices evolve alongside organizational goals and security compliance.

I look forward to discussing my potential contributions.

Sincerely,

Kingston Nguyen
