🌐 linkedin.com/in/callie-roberts 📍 Austin, TX 78701

SUMMARY

Senior Geophysicist with over 20 years managing seismic processing and imaging projects. Successfully led multi-disciplinary teams to execute large-scale programs, ensuring project objectives align with strategic goals. Skilled in defining KPIs, budgets, and leading technical reviews. Experience integrating machine learning methods into workflows for enhanced operational efficiency. Able to translate complex concepts into actionable strategies for clients and foster strong partnerships through dedicated client engagement. Passionate about mentoring peers to cultivate expertise within teams and promote innovative approaches in geophysical practices.

EXPERIENCE

Senior Geophysicist

Geophysical Solutions 📅 January 2018 - Present 📍 Dallas, TX

Oversaw execution of multi-workstream programs in seismic imaging and analysis. Responsible for managing extensive projects across various geophysical applications while coordinating cross-functional teams. Fostered innovation through deploying advanced modeling techniques.

- Spearheaded programs ensuring meticulous management of project scope, timelines, and budgets.
- Implemented novel technical strategies for earth model building, improving data interpretation precision.
- Guided team integration of ML/AI methodologies, optimizing processes and enhancing workflow efficiencies.
- Established clear milestones and KPIs to validate project success and ensure alignment with client expectations.
- Engaged directly with clients, transforming intricate technical details into executive-friendly strategies.
- Developed mentorship initiatives raising technical capabilities within the team around modern imaging practices.

Geophysicist

Earth Sciences Corp 📅 July 2010 - December 2017 📍 Houston, TX

Delivered technological advancements in seismic processing, addressing challenges posed by complex geological formations. Collaborated effectively with R&T teams to transition emerging solutions into production.

- Authored groundbreaking solutions that drove significant project successes in challenging geological settings.
- Partnered closely with teams driving prototypes to final product readiness, showcasing forward-focused technology.
- Conducted valuable workshops representing organizational leadership in industry forums, influencing service quality.
- Championed data-enhancing machine learning efforts, resulting in marked improvements in analysis performance.
- Steered governance risk management initiatives enhancing project oversight and delivery velocity.
- Active participant at sector conferences as thought leader promoting advancement in geophysical standards.

Junior Geophysicist

Geoscience Innovations 📅 August 2005 - June 2010 📍 San Antonio, TX

Assisted with developing impactful seismic models contributing to diverse oil and gas explorations. Supported data analysis initiatives to drive project objectives and achieve defined outcomes.

- Collaborated on the creation of seismic imaging techniques influencing deliverables across multiple projects.

STRENGTHS

🔧 Technical Leadership

Built high-performing teams through effective guidance, enabling breakthrough achievements and collaborative success.

💬 Strategic Communication

Transformed complex data insights into layman terms, aiding executive-level decision-making through engaging presentations.

👤 Mentorship Skills

Inspired junior staff by offering tailored development pathways, inclusive learning sessions to boost team knowledge.

💡 Innovation Facilitation

Drove team engagement towards adopting pioneering techniques, refining operational capabilities and maximizing efficiency.

🤝 Client Relationship Management

Cultivated trust through transparency fostering long-term engagements empowering mutual success on projects.
