SUMMARY

Results-driven Product Manager passionate about using AI for sustainability solutions. Over 4 years of experience in product strategy, adaptive management, and execution to meet compliance needs in dynamic environments. Successfully led cross-functional teams in designing innovative features aligned with global regulatory frameworks. Collaborating with experts in applied AI drives the development of intelligent reporting tools, optimizing efficiency while maintaining focus on customer engagement. Strong background in GHG emission accounting ensures that products align with industry standards. Actively contributing thought leadership through webinars enhances company visibility as a sustainability advocate.

EXPERIENCE

Product Manager January 2023 - Present
GreenTech Innovations Dallas, TX

Lead initiatives focused on AI-powered tools for sustainability, enhancing compliance and customer interaction. Direct collaboration with engineering teams results in shipping impactful product features and improved market alignment through research.

- Develop product features ensuring adherence to regulatory demands.
- Utilize AI-assisted coding tools for efficient prototype creation.
- Collaboration with customers fosters innovative solutions.
- Conduct market analysis driving strategic product direction.

Product Analyst June 2020 - December 2022
Sustainable Future Corp Houston, TX

Supported the product team by developing tools specialized in sustainability reporting and emissions tracking, engaging extensively with clients to facilitate onboarding and consultations.

- Provided training sessions on sustainability frameworks and compliance requirements.
- Gathered client feedback for actionable product specifications.
- Contributed to cross-team efforts aligning product goals with user needs.
- Kept stakeholders informed on project changes and progress.

Junior Product Coordinator August 2019 - May 2020
EcoVision Lab San Antonio, TX

Assisted in product development surrounding sustainability-related applications, ensuring alignment with user expectations through rigorous testing and evaluation processes.

- Facilitated user acceptance testing and coordinated feature enhancements.
- Managed communication between users and product teams for continuous improvement.
- Enhanced quality assurance standards during testing phases.
- Helped streamline workflows resulting in faster product iterations.
